	CHAPTER-II	
	Approximate methods for the solution of the boundary layer equations.	
1	Introduction	31
2	Boundary layer with suction along the porous plate by using Tani's flow.	44
3	Laminar incompressible boundary layer along a porous circular cylinder.	51
4	Boundary layer for Tani's flow past a wedge.	57
5	Boundary layer Tani's flow along the wall of a convergent channel.	62
6	Application of the approximate method to bodies of revolution and three-dimensional boundary layers.	63
