FIGURE	TITLE	AFTER PAGE
1.	Chlorophyll content of <u>Nephrolepis exaltata</u> Schott. in vegetative and reproductive stage.	29
2.	Chlorophyll content in the vegetative stage of <u>Gymnopteris contaminans</u> Bedd.	30
3.	Chlorophyll content in the reproductive stage of <u>Gymnopteris contaminans</u> Bedd.	30
4.	Distribution of carbohydrate contents in different parts of <u>N. exaltata</u> in vegetative stage.	38
5.	Distribution of carbohydrate contents in different parts of <u>N. exaltata</u> in reproductive stage.	38
6.	Carbohydrate contents in different parts of <u>Gymnopteris contaminans</u> Bedd. in vegetative stage.	39
7.	Carbohydrate contents in different parts of <u>Gymnopteris contaminans</u> Bedd. in reproductive stage.	39
8.	Proline contents of <u>N. exaltata</u> in vegetative and reproductive stage.	43

FIGURE	TITLE	AFTER PAGE
9.	Proline contents of <u>G. contaminans</u> in vegetative and reproductive stage.	44
10.	Polyphenol contents of <u>N. exaltata</u> in vegetative and reproductive stage.	50
11.	Polyphenol contents of <u>G. contaminans</u> in vegetative and reproductive stage.	51
12.	Nitrogen content of <u>N. exaltata</u> in vegetative and reproductive stage.	55
13.	Protein contents of <u>N. exaltata</u> in vegetative and reproductive stage.	55
14.	Nitrogen content of <u>G. contaminans</u> in vegetative and reproductive stage.	56
15.	Protein contents in <u>G. contaminans</u> in vegetative and reproductive stage.	56
16.1	Nitrate reductase activity in <u>N. exaltata</u> in vegetative and reproductive stage.	59
16.2	Nitrate reductase activity in <u>G. contaminans</u> in vegetative and reproductive stage.	60

FIGURE	TITLE	AFTER PAGE
17.1	Nitrite reductase activity in <u>N. exaltata</u> in vegetative and reproductive stage.	62
17.2	Nitrite reductase activity in <u>G. contaminans</u> in vegetative and reproductive stage.	63
18.	Sodium content in the vegetative and reproductive stage in <u>N. exaltata</u> .	65
19.	Sodium content in the vegetative and reproductive stage in <u>G. contaminans</u> .	65
20.	Potassium content in the vegetative and reproductive stage in <u>N. exaltata</u> .	67
21.	Potassium content in the vegetative and reproductive stage in <u>G. contaminans</u> .	67
22.	Calcium content in the vegetative and reproductive stage in <u>N. exaltata</u> .	68
23.	Calcium content in the vegetative and reproductive stage in <u>G. contaminans</u> .	68

FIGURE	TITLE	AFTER PAGE
24.	Magnesium content in the vegetative and reproductive stage in <u>N. exaltata</u> .	70
25.	Magnesium content in the vegetative and reproductive stage in <u>G. contaminans</u> .	70
26.	Iron content in the vegetative and reproductive stage in <u>N. exaltata</u> .	72
27.	Iron content in the vegetative and reproductive stage in <u>G. contaminans</u> .	72
28.	Manganese content in the vegetative and reproductive stage in <u>N. exaltata</u> .	73
29.	Manganese content in the vegetative and reproductive stage in <u>G. contaminans</u> .	73
30.	Copper content in the vegetative and reproductive stage in <u>N. exaltata</u> .	75
31.	Copper content in the vegetative and reproductive stage in <u>G. contaminans</u> .	75

FIGURE	TITLE	AFTER PAGE
32.	Zinc content in the vegetative and reproductive stage in <u>N. exaltata</u> .	76
33.	Zinc content in the vegetative and reproductive stage in <u>G. contaminans</u> .	76
34.	Chloride content in the vegetative and reproductive stage in <u>N. exaltata</u> .	82
35.	Chloride content in the vegetative and reproductive stage in <u>G. contaminans</u> .	82
