

ACKNOWLEDGEMENTS

The present work is devoted to study the trends in cropping pattern in Kolhapur district since 1960. In pursuing my work, I had great pleasure of associating with and privileged to work under the able and inspiring guidance of Professor R.R.Doshi, Head of the Department of Economics, Shivaji University, Kolhapur. Under his keen supervision this dissertation has been prepared by me. I had the benefit of his valuable suggestions and constant encouragement without which it would not have been possible for me to accomplish my endeavour. I take this opportunity of acknowledging my sincere feelings of gratitude to and respect for his valuable help throughout the present work. Words are really inadequate to express my feelings for his stimulating suggestions and valuable guidance.

I remain indebted to Dr. K.R.Patil, Principal of Tararani Vidyapeeth's Kamala College, Kolhapur, for his constant encouragement. My gratitude also to the revered President of Tararani Vidyapeeth, Shri V.T.Patil who always served as a constant source of inspiration.

I extend my thanks to the officers and staff of the Soil Erosion Office and District Statistical Office, Kolhapur for their generous cooperation.

My thanks are also due to the Librarian and the staff of Barr. Khardekar Library of Shivaji University, Kolhapur for their valuable assistance.

I am grateful to teaching and non-teaching staff of Kamala College, Kolhapur for their cooperation during my dissertation work.

My work would not have been completed without the patient support of my father-in-law and mother-in-law and my husband Shri V.B.Pathak.

Finally, my gratitude to Sou. S.M.Chitnis for her timely typing assistance and to Shri S.S.Khandekar and Shri R.V.Kulkarni for excellent graphical drawing.
