

A decorative border with a repeating floral motif surrounds the page. The border consists of small, stylized flowers and leaves arranged in a continuous line.

II -	<u>MATERIAL AND METHODS</u>	...
	1. Material	44
	2. Methods	45
	A) Studies of biochemical changes during different stages of leaf growth	
	a) Inorganic constituents	46
	i) Preparation of acid digest .	
	ii) Estimation of potassium, sodium and calcium	
	iii) Estimation of phosphorus	
	b) Organic constituents	47
	i) Chlorophylls	48
	ii) Carotenoids	48
	iii) Proteins	49
	iv) Carbohydrates	49
	v) Total polyphenols	51
	vi) Titratable Acid Number (TAN)	52
	c) Study of Oxidative Enzymes	53
	i) Peroxidase	53
	ii) Catalase	53
	B) Studies of biochemical changes during senescence of detached leaf segments	54
III -	<u>RESULTS AND DISCUSSION</u>	...
	A) Changes in inorganic constituents during leaf development in groundnut	56
	a) Potassium b) Calcium	
	c) Sodium d) Phosphorus	
	B) Changes in electrical conductivity and phosphorus in the incubation medium during senescence of detached leaf segments	68
	C) Changes in photosynthetic pigments during leaf development in groundnut	71
	a) Chlorophylls b) Carotenoids
