

ACKNOWLEDGEMENTS

I take this opportunity to express my sincere gratitude to Dr. Prakash D. Chavan, to whom I am highly indebted, for his extremely valuable and able guidance for this investigation. There is no bound for my sincere appreciation of the great care and trouble which have been taken by him, throughout this work with keen interest and responsibility.

My sincere gratitude and respect goes to our beloved Professor Late Dr. G.V. Joshi for his encouragement and supervision during this work. My thanks are also due to Dr. U.K. Kulkarni, our head of the department for providing laboratory facilities and encouragement.

I am specially indebted to Dr. B.A. Karadge, who is not only responsible for discussing the matter in a criticizing way by making useful comments and valuable suggestions, but also he extended his help to materialise my findings in a graphical form for the thesis in an artistic sense.

My gratitude is extended to my teachers and friends those who helped me in one way or another for my dissertation work. Especially I wish to thank Dr. B.A. Vagyani for providing palaeobotany laboratory for my experimental needs. My appreciation is also for Prof. Rajmane for his timely jokes and encouragement, when I was distressed during my work. Help rendered by Mr. Murumkar, friends of Chemistry Department, Mr. Swamy and Mr. Desai is also highly appreciated.

I am grateful to Dr. S.R. Sree Ranga Swamy, Director,

School of Genetics, Agricultural University, Coimbatore-3
and Mr. B.T. Sankara Gowda, Ragi Scientist, University of
Agricultural Science, Bangalore for the supply of ragi seeds
for my investigation. I also wish to appreciate Dr. O.P.
Saxena of Gujarat University for his critical discussion
and sincere suggestions.

I should like to express my thanks to L.A. Gosavi
for neat and prompt typing and Mr. Deshmukh for nice
photography.

Candidate

Miss Hyma K.R.
