The researcher feels happy and satisfied while presenting this dissertation titled,

" Effect of Multimedia Package on learners achievement in Science. "

The innovations taking place in Science and technological areas have had a direct and indirect influence on the practices of education. This influence has resulted in changes in the syllabi curricula, text-book preparation and methods of teaching etc. The teacher cannot claim of having a complete and thorough content mastery. The teacher is himself a learner. His method of teaching should emphasize the development of such an instructional strategy so that students acquire knowledge effectively and speedily. For this teaching has to be a well organized process, where the students attain the expected learning outcome. The conventional method of teaching has taken a backseat. The use of various, new emerging media expose the learner to a wide variety of learning experiences.

This study stresses on the use of Educational technology to achieve the desired goals in the teaching of Science.

This study is presented to Shivaji University, Kolhapur, in partial fulfilment of the requirement for the degree of M. Phil. in education through the Principal, Azad College of Education, Satara under the guidance of Dr. B. A. Kolpe.
