I INTRODUCTION

1

1. Effect of salinity on growth. 3
2. Classification of plant. (Sensitive, Moderately tolerant) 4
3. Salt tolerance in Halophytes. 5
4. Salt tolerance in Glycophytes. 6
5. Effect of Salinity on plant metabolism Mineral Nutrition. 7
6. Effect of Salinity on chlorophyll (Leaf pigment) 9
7. Effect of salinity on Carbohydrates 9
8. Nitrogen Metabolism 10
9. Proline 11
10. Approaches to solve the Problem 11
 - a. Chemical treatment 12
11. Physiological studies in Capsicum annum 13

II REVIEW OF LITERATURE

1. INTRODUCTION and Distribution 14
2. History and Origin 16
3. Taxonomy 18
4. Botany 18
5. Climate and Soil 19
6. Cultivation 20
7. Harvesting 21

III MATERIAL AND METHODS

1. Photosynthetic pigment 22
2. Titratable acid 23
3. Carbohydrate 23
4. Starch 24
5. Total Polyphenol 25
6. Proline 26
7. Total Nitrogen 26
8. Nitrate Reductase 27

9. Nitrite Reductase	28
10. Mineral Nutrition	28
1. Sodium Potassium	29
2. Phosphorus	29
3. Chlorides	30
4. Iron	32

IV RESULT AND DISCUSSION

1. Growth	33
2. Photosynthetic Pigments (Chlorophylls)	41
3. Titratable acid number	46
4. Carbohydrate	49
5. Proline	59
6. Polyphenols	65
7. Nitrogen Metabolism	70
8. Nitrate Reductase	73
9. Mineral Nutrition	77
1. Na ⁺	83
2. K ⁺	86
3. Ca ²⁺	91
4. Mg ²⁺	94
5. Cl ⁻	97
6. P ⁵⁺	101
7. Fe ³⁺	104
8. Cu ²⁺	107
9. Zn ²⁺	109
10. Mn ²⁺	111

V SUMMARY AND CONCLUSION 113

VI BIBLIOGRAPHY 123
