

## **CONTENTS**

**C O N T E N T S**

| <b>Chapter</b> | <b>Title</b>                                  | <b>Page</b> |
|----------------|---|-------------|
| I              | INTRODUCTION ...                              | 1           |
| II             | REVIEW OF LITERATURE ...                      | 4           |
|                | 1. Salt tolerance in plants ...               | 4           |
|                | 2. Work on <u>Phaseolus aconitifolius</u> ... | 19          |
|                | 3. Scope of present investigation ...         | 27          |
| III            | MATERIAL AND METHODS ...                      | 29          |
|                | 1. Culture ...                                | 29          |
|                | A. Soil culture ...                           | 29          |
|                | B. Sand culture ...                           | 29          |
|                | 2. Methods ...                                | 30          |
|                | A. Growth Analysis ...                        | 30          |
|                | B. Organic constituents ...                   | 31          |
|                | i) TAN ...                                    | 32          |
|                | ii) Polyphenols ...                           | 32          |
|                | iii) Chlorophylls ...                         | 32          |
|                | iv) Carbohydrates ...                         | 33          |
|                | v) Total nitrogen and protein ...             | 33          |
|                | vi) Proline ...                               | 33          |
|                | C. Enzymes ...                                | 33          |
|                | i) Hydroxylperoxidases ...                    | 33          |
|                | a) Peroxidase ...                             | 33          |
|                | b) Catalase ...                               | 34          |

...

| Chapter   | Title  | Page |
|-----------|--|------|
| III 2. C. | ii) Acid phosphatase ...   | 35   |
|           | iii) NR ...  | 35   |
| D.        | Inorganic constituents ...                                       | 36   |
|           | i) Estimation of $\text{Na}^+$ , $\text{K}^+$ , $\text{Ca}^{2+}$ | 37   |
|           | ii) Estimation of $\text{P}^{5+}$ ...                            | 37   |
|           | iii) Estimation of $\text{Cl}^-$ ...                             | 37   |
|           | iv) Estimation of $\text{Mg}^{2+}$ ...                           | 38   |
|           | v) Estimation of $\text{Fe}^{3+}$ and $\text{Mn}^{2+}$           | 38   |
| IV        | RESULTS AND DISCUSSION ...                                       | 39   |
| 1.        | Effect of NaCl salinity on growth and development ...            | 39   |
| 2.        | Effect of NaCl salinity on Organic constituents ...              | 46   |
|           | i) TAN ...   | 46   |
|           | ii) Chlorophylls ...   | 48   |
|           | iii) Polyphenols ...   | 50   |
|           | iv) Carbohydrates ...  | 52   |
|           | v) Total nitrogen and protein ...                                | 55   |
|           | vi) Proline ...  | 59   |
|           | vii) Enzymes ...   | 61   |
|           | a) Hydroxylperoxidases ...                                       | 62   |
|           | a <sub>1</sub> ) Peroxidase ...                                  | 62   |
|           | a <sub>2</sub> ) Catalase ...                                    | 62   |
|           | ...  |      |

| Chapter | Title   | Page |
|---------|---|------|
| IV      | 2. vii) b) Acid phosphatase ...                   | 64   |
|         | c) Nitrate Reductase ...                          | 65   |
| 3.      | Effect of NaCl salinity on Mineral Nutrition. ... | 67   |
| A.      | Soil Culture ...                                  | 67   |
|         | i) $\text{Na}^+$ and $\text{Cl}^-$ uptake ...     | 67   |
|         | ii) $\text{K}^+$ uptake ...                       | 70   |
|         | iii) $\text{Ca}^{2+}$ uptake ...                  | 73   |
|         | iv) $\text{P}^{5+}$ ...                           | 75   |
|         | v) $\text{Mg}^{2+}$ ...                           | 76   |
|         | vi) $\text{Fe}^{3+}$ and $\text{Mn}^{2+}$ ...     | 77   |
| B.      | Sand Culture ...                                  | 80   |
| V       | SUMMARY AND CONCLUSIONS ...                       | 89   |
| VI      | BIBLIOGRAPHY ...                                  | 98   |
