C O N T E N T

CHAPTER	T I T L E	PAGE NO.
	INTRODUCTION	1
I	REVIEW OF LITERATURE :	
	1. Salinity & Plant Metabolism. ...	7
	2. Salt Tolerance studies in Millets. ...	25
	3. Nitrogen Metabolism. ...	31
II	MATERIAL AND METHODS :	
	1. Germination Studies :	
	A. Nitrate Reductase. ...	38
	B. Nitrite Reductase ...	41
	2. Field Studies :	
	A. Growth. ...	42
	B. Photosynthetic Pigments :	
	i) Chlorophylls. ...	43
	ii) Carotenoids. ...	43
	C. Polyphenols. ...	43
	D. Nitrogen Fractions Analysis. ...	43
	E. Proline ...	45
	F. Enzymes : ...	
	i) Nitrate Reductase ...	45
	ii) Nitrite Reductase ...	46
	iii) Glutamate Oxaloacetate Transaminase ...	47
	iv) Alanine Amino Transferase ...	47
	v) Glutamine Synthetase ...	48
	vi) Glutamate Dehydrogenase ...	48

CHAPTER	T I T L E	PAGE NO.
III	RESULTS AND DISCUSSION :	
	1. Germination Studies :	
	A. Germination ...	50
	B. Biomass Production ...	56
	C. Nitrate Reductase ...	59
	D. Nitrite Reductase ...	65
	2. Field Studies :	
	A. Growth ...	67
	B. Pigment Composition ...	
	i) Chlorophylls ...	73
	ii) Carotenoids ...	78
	C. Polyphenols. ...	81
	D. Nitrogen Fractions ...	84
	E. Proline ...	96
	F. Enzymes : ...	
	i) Nitrate Reductase ...	99
	ii) Nitrite Reductase ...	105
	iii) Glutamate Oxaloacetate Transaminase ...	108
	iv) Alanine Amino Transferase ...	111
	v) Glutamine Synthetase ...	113
	vi) Glutamate Dehydrogenase ...	116
IV	SUMMARY AND CONCLUSIONS ...	119
	BIBLIOGRAPHY ...	128
