

ACKNOWLEDGEMENTS

I take this opportunity to express my deep sense of immense gratitude towards my research guide, Dr. Leela J. Bhosale, Reader, Department of Botany, Shivaji University, Kolhapur. She has been an inordinate inspiration and encouragement to me. Only because of her masterly and valuable guidance, and kind co-operation, I am able to complete this work.

I wish to express my sincere thanks to Dr. B. A. Hegde, Prof. and Head, Department of Botany, for his encouragement and making available to me the facilities of the Department. I am also thankful to other staff-members of the Department. I also feel grateful to the University authorities for the opportunity provided to me.

I wish to express my feeling of gratitude to the authorities of the Department of Ocean Development, New Delhi, as the present research work is a part of the project sponsored by them.

I believe, it is my duty to offer my sincere thanks to Dr. Niranjana Mulik and Prasad Kulkarni for their valuable suggestions and help during my research tenure.

I find no words to express my heart-felt thanks to all my research colleagues for the help, they had rendered during my research work.

It would be a great mistake on my part, if I don't acknowledge with thanks the co-operation extended and enthusiastic love given by my mother, brothers and sister to me.

I owe a special word of thanks to Miss Geeta Gosavi for her neat and skilful typing of the manuscript of the thesis.

Finally, I express my deep sense of gratitude to all my well wishers.

Kolhapur

Nov. **23**, 1989.
