CHAPTER NO	T I T L E	Page No
I	GENERAL INTRODUCTION	1-3
II	REVIEW OF LITERATURE	4-35
III	ABOUT THE PLANT	36-44
	1 Introduction	36
	2. Distribution	37
	3. Taxonomy	38
	4. General Morphology	39
	5 Importance	42
IV	MATERIAL AND METHODS	45-58
	1 Selection of materials	45
	2 Raising of plants	46
	3 Preparation of chamber for inoculation	47
	4 Preparation of culture tubes	47
	5 Preparation of Ingredients	48
	i) Macronutrients	
	ii) Micronutrients	
	iii) Iron stock	
	iv) Vitamin stock	
	v) Auxin stock	
	vi) Cytokinin stock	
	vii) Caesin hydrolysate	
	viii) Preparation of coconut milk	

CHAPTER NO	T I T L E	Page No
6	Methods of preparation of culture media	50
	a) Apical meristem culture	
	b) Leaftip tendril culture	
	c) Culturing of the shoot region below the apical dome	
	d) Seed culture	
	e) Callus subculture	
	f) Suspension culture	
7	Selection of explants for culture	53
8	Temperature and light regime	54
9	Chromatographic separation of colchicine	54
	a) Preparation of extract	
	b) Paper chromatography	
	c) Thin layer chromatography	
	d) Preparation of spray reagent	
10	Cytological studies	57
11	Hybridization	57
V	RESULTS AND DISCUSSION	59-107
A	Results	59
I	Murashige and skoogs medium	60-69
II	Yeomans medium	70-78
III	Whites medium	79-85
IV	Callus culture	80-88
V	Callus subculture	89
VI	Suspension culture	90-91
VII	Chromatographic separation of colchicine	92

CHAPTER NO	T I T L E	Page No
VII	Cytological studies in callus	93
IX	Hybridization	94
B	DISCUSSION	95
1	MS medium	96
2	Yeomans medium	107
3	Whites medium	102
4	Callus culture	103
5	Suspension culture	106
6	Cytological studies	107
7	Hybridization	108
8	Chromatographic separation of colchicine	108
VI	SUMMARY AND CONCLUSION	109-113
VII	B I B L I O G R A P H Y	114-133
