

## **ABBREVIATIONS**

---

## ABBREVIATIONS

|                          |   |
|--------------------------|---|
| ADP                      | - Adenosine diphosphate                 |
| Al                       | - Aluminium                             |
| $\alpha$ -amylase        | - Alpha amylase                         |
| ATP                      | - Adenosine triphosphate                |
| B.C.                     | - Before Christ                         |
| Ca                       | - Calcium                               |
| Chl                      | - Chlorophyll (s)                       |
| $\text{CO}_2$            | - Carbondioxide                         |
| Conc                     | - Concentrated                          |
| Cu                       | - Copper                                |
| DNA                      | - Deoxyribose nucleic acid              |
| EC.                      | - Enzyme Code                           |
| FAD                      | - Flavin adenine dinucleotide phosphate |
| Fe                       | - Ferrous                               |
| FIG, fig                 | - Figure                                |
| g                        | - gram                                  |
| $\text{HNO}_3$           | - Nitric acid                           |
| H, h                     | - Hour (s)                              |
| IAA                      | - Indol 3 acetic acid                   |
| K                        | - Potassium                             |
| Kg                       | - Kilogram                              |
| $\text{KNO}_3$           | - Potassium nitrate                     |
| $\text{KH}_2\text{PO}_4$ | - Potassium phosphate, monobasic        |

|             |   |
|-------------|---|
| l           | - litre   |
| Ltd.        | - Limited   |
| M           | - Molar   |
| Mg          | - Magnesium   |
| mg          | - milligram   |
| ml          | - millilitre  |
| mM          | - millimolar  |
| $\mu$ moles | - micromoles  |
| Mn          | - Manganese   |
| N           | - Normality   |
| $Na_2CO_3$  | - Sodium carbonate                                    |
| NADH        | - Nicotinamide adenine dinucleotide reduced           |
| NADPH       | - Nicotinamide adenine dinucleotide phosphate reduced |
| NEEDA       | - N-1 Naphthylene diamide dihydrochloride             |
| NiR         | - Nitrite reductase                                   |
| nm          | - Nanometer   |
| $NO_3$      | - Nitrate   |
| NR          | - Nitrate reductase                                   |
| $O_2$       | - Oxygen  |
| OD -        | - Optical density                                     |
| P           | - Phosphorus  |
| PEG         | - Polyethylene glycol                                 |
| PEP         | - Phosphoenol pyruvate                                |

|                 |  |
|-----------------|--|
| pH              | - Hydrogen ion concentration           |
| Pi              | - Inorganic phosphate                  |
| PSI             | - Photosystem - I                      |
| PS II           | - Photosystem - II                     |
| PO <sub>4</sub> | - Phosphate                            |
| ppm             | - Parts per millions                   |
| RNA             | - Ribonucleic acid                     |
| rpm             | - revolutions per minute               |
| RUBP            | - Ribulose bis phosphate               |
| sp. spp.        | - species                              |
| Syn             | - Synonymous                           |
| TCA             | - Tricarboxylic acid                   |
| TTC             | - 2-3-5 triphenyl tetrazolium chloride |
| VAR, Var        | - Variety                              |
| Zn              | - Zinc                                 |
| °C              | - Degree celsius                       |
| Δ               | - Delta                                |
| >               | - Greater than                         |
| -1              | - per                                  |
| %               | - Per cent                             |
| (Ψ)             | - Psi                                  |
