LIST OF FIGURES

Fig.No.	T i t l e	After Page
1.	Effect of NaCl salinity on total length of *C. roseus* G.Don. grown in pot soil culture.	- 85
2.	Effect of NaCl salinityy on leaf area per plant of *C. roseus* G.Don. grown in pot soil culture.	- 85
3.	Effect of NaCl salinity on number of pods per plant of *C. roseus* G.Don. grown in pot soil culture.	- 86
4.	Effect of NaCl salinity on biomass (fresh and dry weight) of *C. roseus* G.Don. grown in pot soil culture.	- 89
5.	Effect of NaCl salinity on leaf juice acidity in *C. roseus* G.Don. grown in pot soil culture.	- 100
6.	Effect of NaCl salinity on reducing sugars in different parts of *C. roseus* G.Don. grown in pot soil culture.	- 104
7.	Effect of NaCl salinity on total sugars in different parts of *C. roseus* G.Don. grown in pot soil culture.	- 104
8.	Effect of NaCl salinity on starch in different parts of *C. roseus* G.Don. grown in pot soil culture.	- 104
9.	Effect of NaCl salinity on polyphenol content of leaves of *C. roseus* G.Don.grown in pot soil culture.	- 108

Fig.No.	T i t l e	After Page
10.	Effect of NaCl salinity on the total nitrogen content of different parts of C. roseus G.Don. grown in pot soil culture.	- 111
11.	Effect of NaCl salinity on the proline content of the leaves of C. roseus G.Don. grown in pot soil culture.	- 114
12.	Effect of NaCl salinity on the total alkaloids content of leaves and roots of C. roseus G.Don. grown in pot soil culture.	- 117
13.	Effect of NaCl salinity on chlorophyll content of young leaves of C. roseus G.Don. grown in pot soil culture.	- 125
14.	Effect of NaCl salinity on chlorophyll content of mature leaves of C. roseus G.Don.grown in pot soil culture.	- 125
15.	Effect of NaCl salinity on stomatal index of C. roseus. G.Don. grown in pot soil culture.	- 129
16.	Effect of NaCl salinity on diffusive resistance for CO_2 by the leaves of C. roseus G.Don. grown in pot soil culture.	- 132
17.	Effect of NaCl salinity on transpiration rate of leaves of C. roseus G.Don. grown in pot soil culture.	- 133
18.	Effect of NaCl salinity on flow rate of the leaves of C. roseus G.Don.grown in pot soil culture.	- 134

Fig.No.	T i t l e	After Page
19.	Effect of NaCl salinity on uptake and distribution of sodium in different parts of C. roseus grown in pot soil culture.	- 138
20	Effect of NaCl salinity on uptake and distribution of chlorides in different parts of C. roseus grown in pot soil culture.	- 139
21.	Effect of NaCl salinity on uptake and distribution of potassium in different parts of C. roseus grown in pot soil culture.	- 140
22.	Effect of NaCl salinity on uptake and distribution of calcium in different parts of C. roseus grown in pot soil culture.	- 143
23.	Effect of NaCl salinity on uptake and distribution of phosphorus in different parts of C. roseus grown in pot soil culture.	- 145
24.	Effect of NaCl salinity on uptake and distribution of magnesium in different parts of C. roseus grown in pot soil culture.	- 146
25.	Effect of NaCl salinity on uptake and distribution of iron in different parts of C. roseus grown in pot soil culture.	- 148
26.	Effect of NaCl salinity on uptake and distribution of manganese in different parts of C. roseus grown in pot soil culture.	- 150
27.	Effect of NaCl salinity on uptake and distribution of zinc in different parts of C. roseus grown in pot soil culture.	- 152
