

LIST OF TABLES

TABLE	TITLE	PAGE NO.
1.	Grouping of the estimated salt affected areas in India on tentative basis.	10
2.	Effect of NaCl salinity on germination % in <u>Jatropha curcas</u> L.	53
3.	Effect of NaCl salintiy on moisture % and dry matter content in seedlings of <u>Jatropha curcas</u> L.	57
4.	Carbohydrate, protein and lipid contents in different oil yielding seeds.	62
5.	Effect of NaCl salinity on carbohydrate content in seedlings of <u>Jatropha curcas</u> L.	63
6.	Effect of NaCl salintiy on TAN, total nitrogen, crude protein, total lipids and proline content in seedlings of <u>Jatropha curcas</u> L.	66
7.	Effect of NaCl salinity on inorganic constituents in seedlings of <u>Jatropha curcas</u> L.	83
8.	Effect of NaCl salinity on height of shoot, length of root, average number of leaves per plant, leaf thickness and moisture percentage in <u>Jatropha curcas</u> L.	99
9.	Effect of NaCl salinity on chlorophyll contents and chlorophyll a:b ratio in leaves of <u>Jatropha curcas</u> L.	105
10.	Effect of NaCl salinity on TAN in leaves, stem and roots of <u>Jatropha curcas</u> L.	108
11.	Effect of NaCl salinity on carbohydrates in leaves, stem and roots of <u>Jatropha curcas</u> L.	112
12.	Effect of NaCl salinity on total nitrogen, crude protein, polyphenol and proline content in leaves, stem and roots of <u>Jatropha curcas</u> L.	119
13.	Effect of NaCl salinity on mineral nutrition in different parts of <u>Jatropha curcas</u> L.	126
14.	Effect of different forms of nitrogen fertilizers on shoot height, average number of leaves/plant and moisture % in <u>Jatropha curcas</u> L.	151

TABLE	TITLE	PAGE NO.
15.	Effect of different forms of nitrogen fertilizers on chlorophylls in leaves of <u>Jatropha curcas</u> L.	154
16.	Effect of different forms of nitrogen fertilizers on carbohydrate content in leaves, stem and roots of <u>Jatropha curcas</u> L.	158
17.	Effect of different forms of nitrogen fertilizers on TAN, nitrogen, protein, proline and polyphenol content in <u>Jatropha curcas</u> L.	161
18.	Effect of different forms of nitrogen fertilizers on mineral nutrition in <u>Jatropha curcas</u> L.	176
