

LIST OF TABLES

Table No.	T i t l e	Page No.
1	Characteristic features of the recommended varieties with their area of adoption	
2	Growth of safflower variety Nira as affected by sowing dates.	56
3	Growth of safflower variety JSI-7 as affected by sowing dates	57
4	Effect of sowing dates on dry matter and moisture content in two safflower varieties	60
5	Effect of sowing dates on yield characteristics in two safflower varieties.	62
6	Phenological characteristics in two safflower varieties as affected by sowing dates	62
7	Effect of sowing dates on chlorophyll content in the leaves of safflower variety Nira.	71
8	effect of sowing dates on chlorophyll content in the leaves of safflower variety JSI-7	72
9	Influence of sowing dates on carotenoid content in the leaves of safflower varieties.	74
10	Total polyphenol content in the leaves of safflower varieties as influenced by sowing dates.	77
11	Carbohydrate content in the leaves of safflower varieties as affected by sowing dates.	79
12	Effect of sowing dates on soluble protein content in the leaves of safflower varieties.	82
13	Free amino acids influenced by sowing dates in the leaves of safflower varieties.	83
14	Ascorbic acid content affected by the sowing dates in the leaves of safflower varieties.	85
15	Effect of sowing dates on Nitrogen, Phosphorus, Potassium and Sodium content in the leaves of safflower variety Nira.	87

Table No.	Title	Page No.
16	Effect of sowing dates on Nitrogen, Phosphorus, Potassium and Sodium content in the leaves of safflower variety JSI-7	88
17	Influence of sowing dates on Magnesium, Calcium and Iron content in the leaves of safflower variety Nira.	91
18	Influence of sowing dates on Magnesium, Calcium and Iron content in the leaves of safflower variety JSI-7	92
19	Oil content in the developing seeds of safflower varieties.	96
20	Quantitative analysis of lipids during different stages of development in seeds of safflower varieties.	99
21	Qualitative analysis of lipids during different stages of development in seeds of safflower variety Nira.	101
22	Qualitative analysis of lipids during different stages of development in seeds of safflower variety JSI-7	102
23	Total proteins and carbohydrate content in oilcake of safflower varieties.	105
24	Qualitative analysis of safflower seeds during storage.	107
