

ACKNOWLEDGEMENTS

I wish to acknowledge my deep sense of gratitude towards Dr. Jay S. Samant, Professor and Head, Department of Environmental Science, Shivaji University, and my guide, for suggesting the research problem and providing valuable guidance and encouragement throughout the period of my research. I am also thankful to Dr. A.G. Untawale and Dr. Anuradha Samant for valuable academic suggestions and constant encouragement during the research work

I sincerely thank my colleague Prashant Banne, who worked on another topic related to mangroves in the same area. Both of us had mutual benefits when we worked together as a team in the field. My special thanks to Dharmaraj Patil and Girish Jathar for their timely advice and continuous encouragement.

My thanks are also to officers from Kharland and Forest Departments in the coastal districts of Sindhudurg, Ratnagiri, Raigad and Thane in the Konkan region, for providing essential information regarding mangroves. This work would not have been completed without the help rendered by the local people of the villages studied.

I also wish to express my feelings to all the teaching and non- teaching staff in the Department of Environmental Science, Shivaji University, Kolhapur.

It is my duty to offer thanks to the Ministry of Environment and Forests, Government of India, for providing Junior Research Fellowship (JRF) under the research project "Monitoring and Conservation of Faunal Diversity of Mangroves of Maharashtra coast".

Special thanks to my family members particularly, Suhas Jog and Shirish Jog for their encouragement and moral support during the last stage of research work.

Avadhut Jog
