

LIST OF FIGURES

SR. NO.	TITLES	AFTER PAGE NO.
1.	The differant kinds of chilling injury and their physiological changes that appear to produce injury.	22
2.	Possible mechanism of chilling injury proposed changes leading of three kinds of chilling injury on exposure of chilling sensistive plants to a chilling stress.	42
3.	Schematic pathway of the events leading to chilling injury in sensistive plant tissues.	45
4.	Possible mechanism of resistance to chilling temperatures.	53
5.	Effect of chilling temperature during storage of <u>Amaranthus</u> for 48 hours on moisture content of roots, stem and leaves.	90
6.	Effect of chilling temperature during storage of <u>Amaranthus</u> for 96 hours on moisture content of roots, stem and leaves.	90
7.	Effect of chilling temperature during storage of <u>Trigonella</u> for 48 hours on moisture content of roots stem and leaves.	92

SR. NO.	TITLE	AFTER PAGE NO.
8.	Effect of chilling temperature during storage of <u>Trigonella</u> for 96 hours on moisture content of roots, stem and leaves.	92
9.	Effect of chilling temperature during storage of <u>Amaranthus</u> for 48 hours on photosynthetic pigments in the leaves.	99
10.	Effect of chilling temperature during storage of <u>Amaranthus</u> for 96 hours on photosynthetic pigments in the leaves.	100
11.	Effect of chilling temperature during storage of <u>Trigonella</u> for 48 hours on photosynthetic pigments in the leaves.	101
12.	Effect of chilling temperature during storage of <u>Trigonella</u> for 96 hours on photosynthetic pigments in the leaves.	102
13.	Effect of chilling temperature during storage of <u>Amaranthus</u> for 48 and 96 hours on absorption spectrum of photosynthetic pigments.	112
14.	Effect of chilling temperature during storage of <u>Amaranthus</u> for 48 and 96 hours on absorption spectrum of photosynthetic pigments (Sprayed material).	115

SR. NO.	TITLE	AFTER PAGE NO.
15.	Effect of chilling temperature during storage of <u>Trigonella</u> for 48 and 96 hours on absorption spectrum of photosynthetic pigments.	116
16.	Effect of chilling temperature during storage of <u>Trigonella</u> for 48 and 96 hours on absorption spectrum of photosynthetic pigments (Sprayed material).	117
17.	Effect of chilling temperature during storage of <u>Amaranthus</u> for 48 hours on soluble sugar content of roots, stem and leaves.	123
18.	Effect of chilling temperature during storage of <u>Amaranthus</u> for 96 hours on soluble sugar content of roots, stem and leaves.	123
19.	Effect of chilling temperature during storage of <u>Trigonella</u> for 48 hours on soluble sugars of roots, stem and leaves.	124
20.	Effect of chilling temperature during storage of <u>Trigonella</u> for 96 hours on soluble sugars of roots, stem and leaves.	124
21.	Effect of chilling temperature during storage of <u>Amaranthus</u> for 48 hours on starch content of roots, stem and leaves.	125

SR. NO.	TITLE	AFTER PAGE NO.
22.	Effect of chilling temperature during storage of <u>Amaranthus</u> for 96 hours on starch content of roots, stem and leaves.	125
23.	Effect of chilling temperature during storage of <u>Trigonella</u> for 48 hours on starch content of roots, stem and leaves.	126
24.	Effect of chilling temperature during storage of <u>Trigonella</u> for 96 hours on starch content of roots, stem and leaves.	126
25.	Effect of chilling temperature during storage of <u>Amaranthus</u> and <u>Trigonella</u> for 48 and 96 hours on total polyphenol content of the leaves.	131
26.	Effect of chilling temperature during storage of <u>Amaranthus</u> for 48 hours on soluble protein content of roots, stem and leaves.	136
27.	Effect of chilling temperature during storage of <u>Amaranthus</u> for 96 hours on soluble protein content of roots, stem and leaves.	137
28.	Effect of chilling temperature during storage of <u>Trigonella</u> for 48 hours on soluble protein content of roots, stem and leaves.	139

SR. NO.	TITLE	AFTER PAGE NO.
29.	Effect of chilling temperature during storage of <u>Trigonella</u> for 96 hours on soluble protein content of roots, stem and leaves.	140
30.	Effect of chilling temperature during storage of <u>Amaranthus</u> for 48 hours on proline content of roots, stem and leaves.	144
31.	Effect of chilling temperature during storage of <u>Amaranthus</u> for 96 hours on proline content of roots, stem and leaves.	145
32.	Effect of chilling temperature during storage of <u>Trigonella</u> for 48 hours on proline content of roots, stem and leaves.	146
33.	Effect of chilling temperature during storage of <u>Trigonella</u> for 96 hours on proline content of roots, stem and leaves.	147
34.	Effect of chilling temperature during storage of <u>Amaranthus</u> for 48 hours on nitrate content of roots and leaves.	152
35.	Effect of chilling temperature during storage of <u>Amaranthus</u> for 96 hours on nitrate content of roots and leaves.	154

SR. NO.	TITLE	AFTER PAGE NO.
36.	Effect of chilling temperature during storage of <u>Trigonella</u> for 48 hours on nitrate content of roots and leaves.	155
37.	Effect of chilling temperature during storage of <u>Trigonella</u> for 96 hours on nitrate content of roots and leaves.	156
38.	Effect of chilling temperature during storage of <u>Amaranthus</u> and <u>Trigonella</u> for 48 and 96 hours on ascorbic acid content of the leaves.	160
39.	Effect of chilling temperature during storage of <u>Amaranthus</u> for 48 hours on the activity of peroxidase in roots and leaves.	168
40.	Effect of chilling temperature during storage of <u>Amaranthus</u> for 96 hours on the activity of peroxidase in roots and leaves.	168
41.	Effect of chilling temperature during storage of <u>Trigonella</u> for 48 hours on the activity of peroxidase in roots and leaves.	170
42.	Effect of chilling temperature during storage of <u>Trigonella</u> for 96 hours on the activity of peroxidase in roots and leaves.	170

SR. NO.	TITLE	AFTER PAGE NO.
43.	Effect of chilling temperature during storage of <u>Amaranthus</u> for 48 hours on the activity of catalase in roots and leaves.	174
44.	Effect of chilling temperature during storage of <u>Amaranthus</u> for 96 hours on the activity of catalase in roots and leaves.	174
45.	Effect of chilling temperature during storage of <u>Trigonella</u> for 48 hours on the activity of catalase in roots and leaves.	176
46.	Effect of chilling temperature during storage of <u>Trigonella</u> for 96 hours on the activity of catalase in roots and leaves.	176
47.	Effect of chilling temperature during storage of <u>Amaranthus</u> for 48 hours on the activity of nitrate reductase of roots and leaves.	180
48.	Effect of chilling temperature during storage of <u>Amaranthus</u> for 96 hours on the activity of nitrate reductase of roots and leaves.	181
49.	Effect of chilling temperature during storage of <u>Trigonella</u> for 48 hours on the activity of nitrate reductase of roots and leaves.	184
