| <b>Chapter</b> | <b>Title</b>                      | <b>Page No.</b> |
|----------------|-----------------------------------|-----------------|
|                | ACKNOWLEDGEMENTS                  | i               |
|                | i. List of Tables                 | v               |
|                | ii. List of Figures               | viii            |
|                | iii. List of Plates               | x               |
| 1.             | INTRODUCTION                      | 1               |
|                | BACKGROUND                        | 3               |
|                | SCOPE OF PRESENT INVESTIGATION    | 3               |
| 2.             | MATERIAL AND METHODS              | 5               |
|                | I. SELECTION OF PLANTS            | 5               |
|                | II. MATERIAL                      | 6               |
|                | III. METHODS OF ANALYSIS          | 6               |
|                | A. Leaf anatomy                   | 6               |
|                | B. Fresh weight and<br>dry matter | 6               |
|                | C. Mineral elements               | 7               |
|                | IV. ECOLOGICAL MODEL              | 7               |

|    |   |    |
|----|---|----|
| 3. | RESULTS AND DISCUSSION                            | 10 |
|    | I. Leaf anatomy                                   | 10 |
|    | II. Moisture percentage                           | 12 |
|    | III. Dry matter content                           | 15 |
|    | IV. Biomass content                               | 16 |
|    | V. Mineral elements                               |    |
|    | A. Macroelements                                  | 19 |
|    | Sodium  | 19 |
|    | Potassium   | 25 |
|    | Sodium/Potassium                                  | 28 |
|    | Calcium   | 30 |
|    | Magnesium   | 34 |
|    | B. Microelement - Iron                            | 38 |
|    | C. Chloride                                       | 41 |
|    | VI. COMPARATIVE STATERGY OF<br>DIFFERENT ELEMENTS | 52 |
|    | VII. ECOLOGICAL MODEL                             | 61 |
| 4. | SUMMERY AND CONCLUSIONS                           | 67 |
|    | REFERENCES  | 78 |
|    | STATEMENT I                                       | 93 |
|    | STATEMENT II                                      | 94 |
