R E F E R E N C E S

1. BIRKHOFF.G   : Lattice theory, Amer.Math.Soc.
                      Coll.Publ. 25,(1948). MR 37 ≠≠ 2638

2. CIGNOLI R.   : Stone filters and ideals in distri-
                      butive lattices; Bulletin Math.
                      Soc.Sci.Math. R.S.Roumanie,(N.S.),
                      15 (63), (1971), 131-137.

3. CORNISH.W.   : O-ideals, Congruences, and sheaf
                      representations of distributive
                      lattices. Rev. Roum. Math.Pures
                      ET.Appl. Tome XXII, No.S.P.1059-
                      1067, Bucarest (1977)

4. FRINK.O.   : Pseudo-complements in semilattices,
                      Duke Math.J. 29 (1962), 505-514.
                      MR 25 ≠≠ 3869

5. GRATZER.G.   : Lattice Theory : First concepts
                      and distributive lattices, Freeman
                      and Company, San Francisco (1971).

6. JAYARAM.C.   : Complemented semilattices,
                      Mathematics Seminar Notes, 8(1980),
                      259-267.

7. KRISHNAN.V.S.   : The problem of the Last Residue-
                      Class in the distributive lattice,
                      Proc. Indian Acad.Sci. Sect.A 16
                      (1942), 176-190.

8. PAWAR Y.S.   :   A study in lattice theory,
                            Doctoral thesis (1978), Shivaji
                            University, Kolhapur, India.

9. PAWAR Y.S. AND   :   O-Distributive Semilattices,
    THAKARE N.K.   Canad. Math. Bull. 21 (4),1978.

10. RAMALHO MARGARITA   :   Radicals in pseudocomplemented
                            lattices, Algebra Universals
                            20 (1985), 243-253.

11. VENKATANARASIMHAN   :   Stone's topology for pseudo-
    P.V.   complemented and Bicomplemented
                            lattices, Amer. Math.Soc. 170,
                            (1972), 57-70.

12. VENKATANARASIMHAN   :   Ideals in pseudocomplemented
    P.V.   lattices and semilattices, Acta
                            scientiarum Mathematicarum
                            SZEGED (1974), 221-226.
