

## ACKNOWLEDGMENT

The author is grateful to

Dr. C. S. MANJAREKAR,

M.Sc., Ph.D.

Reader,

Department of Mathematics,

Shivaji University, Kolhapur.

for initiating me <sup>to</sup> the enchanting realm of Lattice theory through innumerable lectures and animating discussions. In fact, it was a lucky coincidence that he has come to guide under trying circumstances.

The exquisite scheme of Teacher Fellowship by the University Grant Commission to improve the professional competence of Lecturers in Colleges [ Vide Letter No. 5-70/92(B-II/CD-II) April 26, 1993.] has been of immense benefit to the author in giving the dissertation an excellent finish.

Thanks are also due to his supervision of the study for which the author has been awarded a Teacher Fellowship by the U. G. C., New Delhi, for period 1994-95. The completion of the dissertation within a short span of time owes primarily to his generous sparing of time and affectionate attitude.
