CHAPTER No.	TITLE	PAGE NO
<u>CHAPTER I</u>	<u>INTRODUCTION</u>	..
1.1	History	.. 1
1.2	Definitions	.. 2
1.2.1	Luminescence	.. 2
1.2.2	Fluorescence and phosphorescence	.. 4
1.3	Atomic substitution	.. 4
1.4	Phosphors and their classifications	.. 5
1.4.1	Phosphors in pure form	.. 6
1.4.2	Impurity activated phosphore	.. 6
1.4.3	Imperfections in solids	.. 6
1.5	Mechanism of photoluminescence	.. 8
1.5.1	Excitation and emission	.. 8
1.5.1(A)	Classical configuration co-ordinate curve model	.. 8
1.5.1(B)	Energy band model	.. 9
1.5.1(C)	Schon-Klassen model	.. 10
1.5.1(D)	Lambe-Klicks model	.. 10
1.5.1(E)	Willians and Frener's model	.. 10
1.5.2	Energy transfer	.. 11
1.5.2(A)	Energy transfer with no movement of charge carriers	.. 11
1.5.2(B)	Energy transfer with movement of charge carriers	.. 12

CHAPTER NO.	TITLE	PAGE NO
1.5.3	Energy storage ..	12
(A)	Phosphorescence decay ..	13
(B)	Thermoluminescence ..	14
(C)	Mechanism of EL ..	17
1.6	Reveiw of work done earlier workers ..	23
1.7	Statement of problem ..	27
	References ..	29
<u>CHAPTER II</u>	<u>PREPARATION OF PHOSPHORS, INSTRUMENTATION AND EXPERIMENTAL</u>	
2.1	Preparation of phosphors ..	38
2.1.1	General consideration for Phosphor synthesis ..	38
(A)	Basic ingradients of phosphor ..	38
(B)	Preparative parameters of phosphors ..	40
2.1.2	Preparation of alkaline earth sulphate phosphor ..	43
2.1.3	Details offmethod followed to obtain CaS : RE <sub>1</sub> : RE <sub>2</sub> ..	43
2.2	Prepared phosphors	49
2.2.1	X-ray diffraction analysis of synthesised phosphor ..	50
2.3	Instrumentation and Experimental ..	51
2.3.1	Experimental set up for preparation of phosphors ..	51
2.3.2	Experimental set up for phosphorescence Decay measurement ..	51
2.4	Experimental set up for Thermoluminescence study ..	55

CHAPTER No.	TITLE	PAGE No.
2.5	Experimental set up for .. determination of conductivity at different temperatures by using four probe set up	57
2.6	Experimental set up .. for Electroluminescence	59
	References ..	66
<u>CHAPTER III</u>	<u>PHOTOLUMINESCENCE</u>	
3.1	Introduction ..	78
3.2	Theoretical background ..	78
	3.2.1 Decay law	78
	3.2.2 Effect of steady excitation.. of phosphor	81
3.3	Phosphorescence decay for.. different trap distribution	84
3.4	Results and discussion ..	86
	3.4.1 Decay curves ..	86
	3.4.2 Correlation coefficient ..	87
	3.4.3 Decay constant ..	87
	3.4.4 Variation of decay constant with percentage of activator ..	88
	3.4.5 'Peeling off' of decay .. curves	88
	3.4.6 Life times and starting .. contribution	89
	3.4.7 Activation energy ..	90
	3.4.8 Variation of activation .. energy with % RE <sub>1</sub> : RE <sub>2</sub> in host material	90
	3.4.9 Kinetics of luminescence ..	90
	3.4.10 Distribution of trapping .. levels	91
3.5	Summary ..	92
	References ...	94

CHAPTER NO	TITLE	Page No.
<u>CHAPTER IV</u>	<u>THERMOLUMINESCENCE</u>	
4.1	Introduction ..	120
4.2	Theoretical aspects ..	120
4.2.1	Theory of thermoluminescence	120
4.2.2	First order kinetics : .. Randall and Wilkins theory	121
4.2.3	Second order theory or .. Garlick and Gibson's theory	123
4.2.4	General order kinetics ..	124
4.3+	Methods for determining the . the ' trap depth'	125
(A)	Methods sensitive to the .. recombination kinetics	126
(B)	Methods independent of .. recombination of kinetics	134
4.3.1	Method for determination .. of escape frequency factor	135
4.3.2	Determination of size of trap..	138
4.4	Results and discussion ..	139
4.5.1	Results obtained when .. samples were excited by u.v.for 200 seconds	139
4.5.2	Result obtained when samples were excited by gamma source	143
4.6	Summary ..	145
	References ..	146
<u>CHAPTER V</u>	<u>ELECTRO LUMINESCENCE</u>	
5.1	Introduction ..	177
5.2	Theoretical back ground ..	177
5.2.1	Relation between brightness.. and applied voltage	177

CHAPTER NO	TITLE	PAGE NO
5.2.2	Rleation between brightness an applied frequency	181
5.2.3	Brightness waves ..	183
5.2.4	Efficiency of electro- luminescence ..	184
5.3	Result and discussion ..	185
5.3.1	The voltage dependence of EL brightness ..	185
5.3.2	Frequency dependence of EL brightness ..	187
5.3.3	Relative efficiency ..	188
5.3.4	Brightness waves ..	188
5.3.5	Effect of activators on EL behaviour ..	189
5.3.6	Mechanism of EL ..	189
5.3.7	Kinetics involved in EL process ..	190
5.4	5.3.7 Summary ..	191
<u>CHAPTER VI</u>		
<u>THERMALLY STIMULATED ELECTRIC CONDUCTIVITY OF PHOSPHORS</u>		
6.1	Introduction ..	214
6.2	Resistivity measurement ..	214
6.3	Result and discussion ..	215
6.3.a	Conductivity of phosphor ..	215
6.3 b	Band gap energy ..	218
6.4	Summary ..	218
	References ..	219

CHAPTER No	TITLE	PAGE No
<u>CHAPTER VII</u>	<u>GENERAL RESULTS AND DISCUSSION</u>	
7.1	Phosphorescence study ..	224
7.1.1	Nature of decay ..	224
7.1.2	Activation energy from the decay curve ..	225
7.1.3	Distribution of trapping states ..	225
7.1.4	Kinetics in PL ..	225
7.2	Thermoluminescence study ..	226
7.2.1	TL glow curve ..	226
7.2.2	Activation energies from glow curve ..	227
7.2.3	Escaps frequency factor and size of trap ..	228
7.2.4	Dose dependent study ..	229
7.2.5	Kinetics of thermoluminescence ..	229
7.3	Electroluminescence ..	229
7.3.1	The voltage dependence of EL brightness ..	229
7.3.2	Frequency dependence of EL brightness ..	230
7.3.3	Reletive efficacy ..	230
7.3.4	Brightness waves ..	230
7.4	Thermally stimulated electric conductivity of phosphors ..	231
7.5	Correlation ..	231
