

## C O N T E N T S

CHAPTER	TITLE	PAGE
<b>I</b>	<b>FERROELECTRIC</b>	
1.1	Introduction.	1
1.2	Ferroelectric materials and their characteristic properties.	3
1.3	Classification of ferroelectrics.	7
1.4	Ferroelectric domains.	10
1.5	Spontaneous polarization.	12
1.6	Dielectric properties and polarizability.	13
1.6.1	Dielectric properties.	13
1.6.2	Polarizability.	15
1.7	Theories of ferroelectricity.	18
1.7.1	Thermodynamic theory.	20
1.7.2	Spontaneous polarization.	23
1.7.3	Second-order transition.	25
1.7.4	First-order transition.	27
1.8	Applications.	30
1.8.1	Linear properties.	31
1.8.2	Non-linear properties.	31
1.9	Orientation of the present work.	32
	References.	34

CHAPTER	TITLE	PAGE
II	PREPARATION OF THE SAMPLE AND X-RAY DIFFRACTION STUDY	
	Part I : Preparation of the sample.	
2.1	Introduction.	36
2.2	Preparation of the sample.	40
2.3	The general formula.	40
2.4	Raw-materials.	40
2.5	Weighing.	40
2.6	Pre-sintering.	41
2.7	Pellet formation.	41
2.8	Final-sintering.	41
2.9	Control of porosity.	41
	Part II : X-ray diffraction study.	
2.10	The structure of perovskite type ferroelectrics.	42
2.11	X-ray diffraction studies.	43
2.12	Crystal structure characteristion.	47
2.13	Results and discussion.	48
2.14	Porosity in $K(Ni_x Fe_y Nb_z)O_3$ ferroelectric system.	49
	References.	57

CHAPTER	TITLE	PAGE
<b>III</b>	<b>DIELECTRIC HYSTERSIS</b>	
3.1	Introduction.	58
3.2	Hystersis loop.	59
3.3	Experimental details.	59
3.4	Hysteresis loop of potassium niobate.	61
3.5	Hysteresis loop of $K(Ni_x Fe_y Nb_z)O_3$ system	61
3.6	Results and discussion.	62
	References.	74
<b>IV</b>	<b>DIELECTRIC PERMITIVITY</b>	
4.1	Introduction.	75
4.2	Experimental.	77
4.3	Results and discussion.	79
	References.	86
<b>V</b>	<b>D.C. ELECTRICAL CONDUCTIVITY</b>	
5.1	Introduction.	87
5.2	Experimental.	88
5.3	D.C. Electrical conductivity of $KNbO_3$ and $K(Ni_x Fe_y Nb_z)O_3$ system of ferroelectric semiconducting ceramics.	92
5.4	Results and discussion.	103
	References.	105

CHAPTER	TITLE	PAGE
VI	THERMOELECTRIC POWER	
6.1	Introduction.	106
6.2	Experimental.	107
6.3	Thermoelectric power of $\text{KNbO}_3$ and $\text{K}(\text{Ni}_x \text{Fe}_y \text{Nb}_2)\text{O}_3$ .	107
6.4	Results and discussion.	109
	References.	119
VII	SUMMARY AND CONCLUSIONS	120
	References.	129
