

C O N T E N T S

<u>CHAPTER NO.</u>	<u>TITLE</u>	<u>PAGE NO.</u>
<u>CHAPTER I</u>		
<u>INTRODUCTION</u>		
1-1	Luminescence ..	1
1-2	Definations ..	2
1-2.1	Luminescence ..	2
1-2.2	Fluorescence and Phosphorescence	4
1-3	Phosphors and their classification	4
1-3.1	Phosphors in pure form ..	5
1-3.2	Impurity activated phosphors ..	5
1-3.3	The sulphide phosphors ..	6
1-4	Localised energy levels in forbidden gap ..	6
1-5	Mechanism of luminescence ..	8
1-5.1	A) Excitation and emission ..	8
1-5.1	B) Energy transfer ..	11
1-5.1	C) Energy Storage ...	13
1-6	Phosphorescence decay ..	13
1-7	Thermoluminescence ..	14
1-7.1	Glow curves ..	15
1-8	Kinetics of luminescence ...	15
1-9	Statement of Problem ..	17
	References ..	19
<u>CHAPTER II</u>		
<u>PREPARATION OF PHOSPHORS AND</u>		
<u>DETAILS OF THE SAMPLES PREPARED.</u>		
2-1	Preparation of phosphors ..	28
2-1.1	General considerations for phosphor synthesis ..	28

CHAPTER NO.	TITLE	PAGE NO.
	A. Basic ingredients of a Phosphor	29
	B. Preparative parameter of Phosphors	31
2-1.2	Preparation of Alkaline earth sulphide phosphors ..	33
2-1.3	Details of the method followed ..	34
2-1.4	Prepared phosphors ..	37
<u>CHAPTER III</u>		
<u>INSTRUMENTATION AND EXPERIMENTAL</u>		
3-1	Experimental set up for preparation of Phosphors ..	42
3-2	Experimental set up for Phosphorescence decay measurement ..	43
3-3	Experimental set up for Thermoluminescence study ..	47
3-3.1	Gamma Source ..	47
3-3.2	Linear temperature programmer ..	47
<u>CHAPTER IV</u>		
<u>PHOTOLUMINESCENCE STUDY</u>		
	<u>PHOSPHORESCENCE DECAY.</u> ..	56
4-1	Introduction ..	56
4-2	Theoretical background ..	56
4-2.1	Decay law: ..	56
	A. Exponential Decay ..	57
	B. Hyperbolic Decay ..	58
4-2.2	Effect of steady excitation of a phosphor on the filling of electron traps ...	60
4-3	Phosphorescence decay for different trap distribution ..	63

CHAPTER NO.	TITLE	PAGE NO.
4-3	a) Uniform trap distribution ..	63
	b) Quasi uniform trap distribution	64
	c) Exponential trap distribution ..	64
4-4	Results and discussion ..	65
4-4.1	Decay Curves ..	65
4-4.2	Correlation Coefficient ..	66
4-4.3	Decay constant ..	66
4-4.4	Variation of decay constant with the concentration of activator and coactivator ..	67
4-4.5	"Peeling Off" of decay curves ..	67
4-4.6	Life times and starting contribution	69
4-4.7	Activation energy ..	69
4-4.8	Variation of activation energy with concentration of Mg ..	69
4-4.9	Kinetics of decay ..	70
4-4.10	Distribution of trapping levels ..	71
4-5	Summary ..	72
	References ..	75
<u>CHAPTER V</u>	<u>THERMOLUMINESCENCE</u> ..	93
5-1	Introduction ..	93
5-2	Theoretical aspects ..	94
5-2.1	Theory of thermoluminescence ..	94
	A. Randall & Wilkins theory ..	94
	B. Garlike and Gibson's theory ..	96
5-2.2	Methods for determining the 'trap depth'. ..	97

CHAPTER NO.	TITLE	PAGE NO.
	A. Method sensitive to recombination kinetics ..	97
	B. Method independent of recombination kinetics ..	105
5-3	Kinetics of thermoluminescence glow peaks ..	106
5-3.1	First order kinetics ..	106
5-3.2	Second order kinetics ..	108
5-3.3	General order kinetics ..	109
5-4	Method for determination of escape frequency factor ..	112
	1. Method due to Randall & Wilkins	112
	2. Method due to Garlick & Gibson	113
	3. Isothermal decay method ..	113
	4. Method due to curie ..	113
	5. Method due to Aramu and Maxia .	114
5-5	Determination of size of the traps. ..	114
5-6	Results and Discussion ..	115
5-6.1	Glow curves of Gamma irradiated samples ..	115
5-6.2	Activation energies of the glow peaks ..	116
5-6.3	Variation of activation energy with activator concentration	117
5-6.4	Kinetics of thermoluminescence	117
5-6.5	Escape frequency factor ..	117

CHAPTER NO.	TITLE	PAGE NO.
5-6.6	Size of the traps ..	118
5-7	Glow curves of Ultraviolet irradiated samples ..	118
5-7.1	Activation energies of the glow peaks ..	119
5-7.2	Variation of activation energy with concentration ..	119
5-7.3	Kinetics of thermoluminescence	120
5-7.4	Escape frequency factor ..	120
5-7.5	Size of the traps ..	120
5-7.6	Dose dependence study ..	120
5-8	On Different peak temperature observed ..	121
5-9	Summary ..	122
	References ..	131
<u>CHAPTER VI</u>	<u>General Discussion and Results</u>	156
	Photoluminescence study ..	156
6-1	Nature of Decay ..	156
6-2	Activation energies from decay curves ..	157
6-3	Distribution of trapping States	157
6-4	Thermoluminescence Study ..	158
6-4.1	TL glow curves ..	158
6-4.2	Activation energies from glow curves ..	159
6-4.3	Variation of activation energy with activator and co-activator concentration ..	159

CHAPTER NO.	TITLE	PAGE NO.
6-4.4	Escape frequency factor and size of the traps ..	160
6-4.5	Dose dependence study ..	160
6-5	Nature and Origin of traps ..	160
6-6	Kinetics of luminescence ..	161
