

## C O N T E N T S

CHAPTER	TITLE	PAGE
I	FERROELECTRICS	... 1
1.1	Introductory : Historical	... 1
1.2	Characteristic features	... 3
1.3	Ferroelectric polarizability	... 6
	1.3(a) Dielectric properties	... 6
	1.3(b) Polarizability	... 8
	1.3(c) Polarization relaxation	... 11
1.4	Classification of ferroelectrics	... 13
1.5	Spontaneous polarization	... 15
1.6	Ferroelectric domains	... 16
1.7	Theoretical review	... 18
	1.7(a) Thermodynamic theory	... 18
	1.7(b) Second order transition	... 20
	1.7(c) First order transition	... 23
	1.7(d) Model theories of ferroelectrics	... 26
	1.7(e) Cochran's theory	... 27
1.8	Applications of ferroelectrics	... 29
1.9	Orientation of the present work	... 31
	References	... 34
II	PREPARATION AND X-RAY DIFFRACTION STUDIES OF SAMPLES	... 37
2.1	Introduction	... 37
2.2	Preparation of sodium vanadate	... 38
2.3	Preparation of NaVO <sub>3</sub> doped with Fe <sub>2</sub> O <sub>3</sub>	... 39
2.4	Structural characteristics	... 39
2.5	X-ray diffraction studies	... 40
	2.5.1 Introduction	... 40
	2.5.2 XRD patterns and lattice parameters	... 42
2.6	Microstructure studies	... 47
	References	... 55

CHAPTER	TITLE		PAGE
III	DIELECTRIC HYSTERESIS	...	56
	3.1 Introduction	...	56
	3.1.a Hysteresis loop	...	56
	3.1.b Coercive field	...	59
	3.1.c Experimental reports on dielectric behavior of ferroelectrics	...	59
	3.2 Experimental details	...	60
	3.2.a Hysteresis loop of $\text{NaVO}_3$ and its compositions	...	62
	3.2.b Coercive field measurements	...	67
	3.3 Results and discussion	...	67
	References	...	75
IV	DIELECTRIC CONSTANT	...	77
	4.1 Introduction	...	77
	4.2 Experimental details	...	82
	4.3 Results and discussion	...	82
	References	...	90
V	D. C. ELECTRICAL CONDUCTIVITY	...	91
	5.1 Introduction	...	91
	5.2 Experimental details	...	94
	5.3 Results and discussion	...	96
	References	...	111
VI	SUMMARY AND CONCLUSIONS	...	113
	References	...	119
