

## C O N T E N T S

CHAPTER	TITLE	PAGE
I	INTRODUCTION	
1.1	Introduction	1
1.2	Historical Developments	2
1.3	Theories of Ferrimagnetism	3
1.4.A	Electromagnetic Properties	14
1.4.B	Electrical Properties	18
1.5	Applications of Ferrites	21
1.6	Orientation of the Work	22
	References	24
II	PREPARATION OF FERRITES AND CRYSTAL STRUCTURE CHARACTERISATION	
2.1	Introduction	26
2.2	Methods of Ferrite Preparation	27
2.3	Flow Chart	33
2.4	Preparation of Ferrite under Investigation	33
2.5	Crystal Structure of Ferrite	36
2.6	Structural Co-ordinate of Cubic Spinels	41
2.7	Parameters Involved in Spinel Ferrites	42
2.8	Diffraction Study	43
2.9	X-Ray Diffraction Study	45
2.10	Results and Discussion	49
	References	74

....

CHAPTER	TITLE	PAGE
III	D.C. ELECTRICAL RESISTIVITY, CURIE TEMPERATURE, THERMOELECTRIC POWER OF $Zn_xMg_{1-x}Fe_2O_4$ FERRITE SYSTEM DOPED WITH 0.01 MOL. Wt.% $ZrO_2$	
	3.1 Introduction	76
	3.2 Conduction in Ferrites	78
	3.3 Curie Temperature	85
	3.4 Thermoelectric Power	86
	3.5 Results and Discussion	91
	References	112
IV	MAGNETIZATION IN $Zn_xMg_{1-x}Fe_2O_4$ FERRITE SYSTEM DOPED WITH 0.1 MOL. Wt. % $ZrO_2$	
	4.1 Introduction	114
	4.2 Classification of Magnetic Materials and Spin Ordering	115
	4.3 Origin of Domains and Energy Considerations	117
	4.4 Wall Formation	120
	4.5 Domain Wall and Irreversibility	121
	4.6 Hysteresis and Coercivity	122
	4.7 Losses in Magnetic Materials	126
	4.8 Experimental Setup and Measurement Technique	129
	4.9 Results and Discussion	131
	References	140
IV	SUMMARY AND CONCLUSIONS	142
	References	144
