

IV

GENERAL REMARKS

- (1) The structures are indicated by a double number, the first part of which indicates the chart in which it occurs and the second part indicates the serial number of structures.
- (2) The I.R. spectra were recorded in nujol or liquid film on Perkin-Elmer-783 instrument and the values are expressed in cm^{-1} .
- (3) The PMR spectra were recorded in CCl_4 with TMS as an internal reference on Perkin-Elmer (90 MHz) spectrometer. The chemical shifts are expressed in ppm (δ units).
- (4) The spectra are given just before the experimental part.
- (5) The organic extracts were dried over anhydrous sodium sulphate, unless otherwise mentioned.
