<u>CHAPTER I</u>	
<u>INTRODUCTION</u>	
1.1	Solid state Luminescence .. 1
1.2	Definitions .. 3
1.2.1	Luminescence .. 3
1.2.2	Fluorescence and Phosphorescence .. 4
1.3	Phosphors and their classification .. 5
1.3.1	Phosphors in pure form .. 5
1.3.2	Impurity activated phosphors .. 5
1.4	Localised energy levels in forbidden gap .. 6
1.5	Mechanism of Photoluminescence .. 7
1.5.1	Excitation and Emission .. 7
1.5.2	Energy Transfer .. 10
1.5.3	Energy Storage .. 11
1.6	Mechanism of Electroluminescence .. 13
1.6.1	Excitation .. 13
1.6.2	Energy transfer .. 16
1.6.3	Recombination .. 16
1.7	Kinetics of Luminescence .. 18
1.8	Brief survey of luminescent materials .. 19
1.9	Statement of Problem .. 20
1.9.1	Phosphorescence decay .. 21
1.9.2	Thermoluminescence decay .. 21
1.9.3	Electroluminescence decay .. 21
1.9.4	Thermally Stimulated conductivity .. 21
	References .. 22
<u>CHAPTER II</u>	
<u>PREPARATION OF PHOSPHORS AND EXPERIMENTAL ASPECTS</u>	
2.1	Introduction .. 32
2.2	General consideration for phosphor preparation 32
2.2.1	Basic ingredients of a phosphor .. 32
2.2.2	Preparative parameters of phosphors .. 35

2.3	Details of method followed to obtain CaS:Mn:Sm phosphor	..	36
2.3.1	Method of calculation of the manganese percentage	..	37
2.3.2	Procedure followed in preparation of phosphors	..	38
2.3.3	Prepared phosphors	..	42
2.3.4	X-ray diffraction studies	..	43
2.4	Instruments and experimental aspects	..	43
2.4.1	Instruments used for preparation of phosphors	..	43
2.4.2	Phosphorescence decay measurements	..	44
2.4.3	<del>Instruments</del> Thermoluminescence measurements		44
2.4.4	Electroluminescence measurements	..	48
2.4.5	Conductivity measurements	..	50
	References	..	56

### CHAPTER III

#### PHOTOLUMINESCENCE

3.1	Introduction	..	68
3.2	Theoretical background	..	68
3.2.1	Decay laws	..	69
3.2.2	Effect of steady excitation of a phosphor on the filling of electron traps	..	71
3.2.3	Phosphorescence decay for different trap distribution	..	74
3.2.4	Retrapping of electrons during phosphorescence	. ..	76
3.3	Results and Discussion	..	77
3.3.1	Decay curves	..	77
3.3.2	Correlation coefficient	..	78
3.3.3	Decay constant	..	79
3.3.4	Variation of decay constant with activator concentration	..	79

3.3.5	Peeling off of decay curves	..	80
3.3.6	Effect of activator concentration on trap depths	..	81
3.3.7	Distribution of traps	..	81
3.3.8	Kinetics of luminescence	..	82
3.4	Summary	..	83
	References	..	86

#### CHAPTER IV

#### THERMOLUMINESCENCE

4.1	Introduction	..	105
4.2	Theory of Glow curve	..	106
	4.2.1 TL glow curve parameters	..	106
	4.2.2 Randall and Wilkins Theory (First order kinetics)	..	107
	4.2.3 Garlick and Gibson theory (Second order Kinetics)	..	108
	4.2.4 General order kinetics	..	109
4.3	Methods for determining trap depths	..	112
	4.3.1 Methods making use of shape of glow curves	..	112
	4.3.2 Methods making use of various heating rates	..	116
	4.3.3 Other methods	..	117
4.4	Methods for determination of escape frequency factor	..	121
	4.4.1 Method due to Randall and Wilkins	..	122
	4.4.2 Method due to Garlick and Gibson	..	122
	4.4.3 Isothermal decay method	..	123
	4.4.4 Method due to Aramu and Maxia	..	123
	4.4.5 Method due to curie	..	123
4.5	Determination of size of trap	..	123
4.6	Results and discussion	..	124
	4.6.1 Results obtained when samples were excited by uv source for three minutes		124
	4.6.2 Results obtained when excitation source used is CO <sub>60</sub> gamma source (30 minutes dose).	..	128
4.7	Summary	..	130
	Reference	..	135

## CHAPTER V

### ELECTROLUMINESCENCE

5.1	Introduction	..	162
5.2	Theoretical background	..	162
	5.2.1 Relation between brightness and applied voltage	..	162
	5.2.2 Relation between brightness and frequency	..	166
	5.2.3 Brightness waves	..	168
	5.2.4 Efficiency of electroluminescence	..	169
5.3	Results and discussion	..	170
	5.3.1 Voltage dependance of EL brightness	..	170
	5.3.2 Frequency dependance of EL brightness	..	172
	5.3.3 Relative efficiency	..	173
	5.3.4 Brightness waves	..	174
	5.3.5 Effect of activators on electroluminescence behaviour	..	175
	5.3.6 Mechanism of electroluminescence	..	175
	5.3.7 Kinetics involved in EL process	..	176
5.4	Summary	..	176
	References	..	179

## CHAPTER VI

### THERMALLY STIMULATED CONDUCTIVITY

6.1	Introduction	..	198
6.2	Experimental Procedure	..	198
6.3	Results and discussion	..	199
	References	..	202

## CHAPTER VII

### RESULTS AND GENERAL DISCUSSION

7.1	Nature of decay	..	204
7.2	Activation energies from decay curves	..	204
7.3	Distribution of trapping states	..	205

7.4	Glow Curves	..	205
7.5	Activation energies from glow curves	..	206
7.6	Size of trap	..	207
7.7	Dose dependance	..	207
7.8	EL brightness-voltage dependance	..	207
7.9	Brightness- <del>for</del> frequency dependance	..	208
7.10	Effect of addition of activators on EL behaviour	..	208
7.11	Mechanism of electroluminescence	..	208
7.12	Brightness waves	..	209
7.13	Kinetics of luminescence	..	209
