

LIST OF TABLES

		<u>Page</u>
Table 2.1	Showing details of samples prepared	53
Table 2.2	Showing samples prepared with various concentration of Mn and Sm	54
Table 2.3	X-ray diffraction data of CaS:Mn:Sm phosphor (SD 13)	55
Table 3.1	Showing correlation coefficient and decay constant obtained for various phosphors.	84
Table 3.2	Showing activation energies calculated from peeling off of decay curves for different samples	85
Table 4.1	Showing the peak temperatures and peak intensity values obtained from glow curves of uv excited samples	131
Table 4.2	Showing activation energies calculated with different formula & uv excited samples)	132
Table 4.3	Showing frequency factor and size of trap (uv excitation)	133
Table 4.4	Showing peak temperature, peak intensity, activation energy, frequency factor, and size of trap for γ irradiated samples	134
Table 5.1	Values of threshold voltages for different samples at different frequencies	177
Table 5.2	Values of n for different samples at different frequencies	178
Table 6.1	Showing the values of conductivity and resistivity at different temperatures	201
