

C O N T E N T S

CHAPTER	TITLE	PAGE
	LIST OF CONTENTS	... I-IV
	LIST OF TABLES	... V
	LIST OF FIGURES	... VI-VII
I	INTRODUCTION	
1-1	Luminescence	... 1
1-2.1	Classification of Luminescence Phenomenon	... 3
1-2.2	Fluorescence and Phosphorescence	... 4
1-3	Phosphors and Related Terms	... 5
1-3.1	Definition	.. 5
1-3.2	Classification of Phosphors	... 5
1-3.3	Localised energy levels in forbidden gap	... 6
1-4	Criterion for Occurrence of Luminescence	... 8
1-5	Recombination Processes	... 9
1-5.1	Radiative Recombination Process	... 9
1-5.2	Non-radiative Recombination Processes	... 11
1-6	Mechanism of Luminescence	... 12
1-6.1	Photoluminescence	... 12
1-6.2	Thermoluminescence	... 18
1-7	Sensitization Phenomenon and Concentration Quenching	... 19
1-8	Kinetics of Luminescence	... 20
1-9	Point Defects, Colour Centres, Luminescence and EPR	... 21
1-10	Statement of the Problem	... 22
	References	... 24

....

Contents (contd.)

CHAPTER	TITLE	PAGE
II	PHOSPHOR SYNTHESIS AND EXPERIMENTAL ASPECTS	
2-1	Synthesis of Phosphors	... 36
	A) Basic ingredients of a phosphor	... 36
	B) Preparative parameters of phosphor	... 38
2-2	Details of the Method followed for Preparation of CaO : Bi : Mn Phosphors	... 41
2-2.1	First Stage	... 41
2-2.2	Second Stage	... 43
2-2.3	Prepared Phosphors	... 44
2-3	Experimental Aspects	... 44
2-3.1	Thermoluminescence Measurements	... 44
	A) Experimental Set up	... 44
	B) Experimental Procedure	... 46
2-4	X-ray Diffraction Measurements	... 46
2-5	Electron Paramagnetic Resonance (EPR) Measurements	... 46
	References	... 49
III	THERMOLUMINESCENCE	
3-1	Introduction	... 55
3-2	Theory	... 56
3-2.1	Theory of Thermoluminescence	... 56
	A) Randall and Wilkin's Theory	... 56
	B) Garlick and Gibson's Theory	... 57
3-2.2	Methods for Determining Trap Depths	... 57
3-2.3	Methods for Determining the Escape Frequency Factor	... 68
3-3	Results and Discussions	... 71
3-3.1	Glow Curves	... 71
3-3.2	Activation Energies of Glow Peaks	... 73

....

Contents (contd.)

CHAPTER	TITLE	PAGE
3-3.3	Escape Frequency Factor 75
3-3.4	Variation of the Activation Energy with Activator Concentration 76
3-3.5	Kinetics of Thermoluminescence Process 76
3-4	Summary 77
	References 85
IV	X-RAY DIFFRACTION AND ELECTRON PARAMAGNETIC RESONANCE STUDIES	
4 A	X-Ray Diffraction (XRD) Studies 93
4A.1	Introduction 93
4A-2	Crystal Structure of CaO 94
4A-2.1	Structure Determination from Powder Pattern 94
4A-2.2	Indexing Powder Patterns 95
4A-2.3	Determination of Number of Atoms in a Unit Cell 95
4A-3	Determination of Atom Positions 96
4A-4	Precise Parameter Measurements 98
4A-5	Qualitative Analysis of Powder Mixtures 100
4A-6	Results and Discussion 101
4A-6.1	CaO, fluxed CaO and fluxed CaO:Bi:Mn Phosphors. 101
4A-6.2	Dependence of XRD Intensity on Activator Concentration 103
4A-6.3	Variation of Lattice Constant with Activator Concentration 104
4A-6.4	Summary 104
4 B	Electron Paramagnetic Resonance (EPR) Studies 105
4B-1	Introduction 105
4B-2	Theoretical Background 106

.....

CHAPTER	TITLE	PAGE
4B-2.1	Resonance Conditions 106
4B-2.2	Fine Structure 107
4B-2.3	General Hamiltonian of the free ion 109
4B-2.4	EPR Spectrum of Mn 111
4B-2.5	Effect of Temperature on EPR Spectrum 113
4B-3	Results and Discussion 114
4B-3.1	EPR spectrum of CaO Phosphor (without flux) 114
4B-3.2	EPR spectra of CaO:Bi:Mn Phosphors 115
4B-3.3	Spin Hamiltonian Parameters 116
4B-3.4	Effect of Activator Concentration on line width 116
4B-3.5	Effect of Temperature on EPR Spectrum 116
4B-3.6	Summary	... 117
	References 125
V GENERAL DISCUSSIONS AND CONCLUSIONS		
5-1	Glow Curves 148
5-2	Activation Energy from Glow Peaks 149
5-3	Escape Frequency Factor 149
5-4	Effect of Activators on Trap Parameters 150
5-5	Nature and Origin of Traps 150
5-6	Kinetics of Thermoluminescence 150
5-7	X-Ray Diffraction Studies 151
5-8	Dependence of XRD Intensity on Activator Concentration...	151
5-9	Variation of Lattice Constant with Activator Concentration 152
5-10	Position of Bi ³⁺ and Mn ²⁺ in CaO Lattice 152
5-11	Electron Paramagnetic Resonance Studies 152
5-12	Effect of Temperature on EPR Spectrum 153
5-13	Conclusions 153
	References 155
