

## CONTENTS

CHAPTER	TITLE	PAGE NO
<hr/>		
I	FERROELECTRICS -----	
1.1	Introduction	4
1.2	Ferroelectric Materials and Their Characteristic Properties.	8
1.3	Dielectric Properties and Polarization	8
	a) Dielectric Properties	
	b) Polarizability	
1.4	Classification Of Ferroelectrics.	13
1.5	Spontaneous Polarization.	18
1.6	Ferroelectric Domains	19
1.7	Literature Survey and Orientation of Present Work.	22
II	SAMPLE PREPARATION AND EXPERIMENTAL SET UP -----	
2.1	Introduction.	29
2.2	The Crystal Structure and The Tolerance Factor.	29
2.3	Chemistry of BaTiO <sub>3</sub> Formation.	35
2.4	Reaction for The Substitued Compounds.	36
2.5	Preparation Of The Samples.	37

- 2.6 Experimental Set Up.
- a) The Constant Temperature Zone Furnace.
- b) Calibration Of The Furnace.
- c) The Sample mount and Experimental Set Up.

III X-RAY DIFFERATION STUDY.

-----

- 3.1 The Structure of Perovskite-Type Ferroelectrics 49  
50
- 3.2 The Structure of BaTiO<sub>3</sub> In The Tetragonal Phase.
- 3.3 Method Of Determination Of Parameters 'a' and 'c' 52
- 3.4 The Result and Discussion. 54

IV DIELECTRIC PERMITTIVITY AND DTA. *9 full*

-----

- 4.1 Introduction. 67
- 4.2 Experimental. 71
- 4.3 Result and Discission. 74
- a) The FeSb Composition.
- b) The CrSb Composition.
- 4.4 The Differential Thermal Analysis. 96  
97
- 4.5 The Result and Dissscussion.

V

D.C.ELECTRICAL CONDUCTIVITY

5.1	Introduction.	100
5.2	Experimental.	103
5.3	Result and Discussion.	104
