

LIST OF FIGURES

FIGURE NO.	TITLE	PAGE NO.
1.1	Construction of hologram	9
1.2	Reconstruction of hologram	10
1.3	Geometries for recording different types of holograms	16
2.1	Geometry for the tilt of diffusely reflecting surface	28
2.2	Geometry for localization of fringes	32
2.3	Ray tracing method to determine the localization plane	35
2.4	Geometry of the holographic interferometry with image system (ξ, η, ζ) , object system (X, Y, Z) and sensitivity vector $\mathbf{E}(\xi, \eta)$	42
3.1	Vibration isolation table	58
3.2	Michelson interferometer	60
3.3	Source with modes a) TEM_{00} b) TEM_{01} c) TEM_{MULTI}	62
3.4	Laser power meter	66
3.5	Experimental setup used for recording holograms	77

FIGURE NO.	TITLE	PAGE NO.
3.6	Experimental arrangement for two-beam off-axis holography	85
3.7	Jet valve	90
3.8	Steel cylinder	91
3.9	Experimental arrangement for holographic optical testing	94
