

C O N T E N T S

CHAPTER	TITLE	PAGE
I	INTRODUCTION	(1 - 33)
1.1	Introduction	1
1.2	a)Structure of ferrites	3
	b)Classification of ferrites	7
1.3	Characterization	8
1.4	Magnetic properties of ferrites	10
1.5	Neel's theory of ferrimagnetism	13
1.6	Yafet - Kittel theory	16
1.7	Initial Permeability	20
1.8	Data on Ni-ferrite and Cd-ferrites	23
1.9	Applications of ferrites	25
	Recording heads	27
1.10	Orientation of the Problem	29
	References	32
II	PREPARATION AND CHARACTERIZATION	(34 - 83)
	PART-A METHOD OF PREPARATION	
2.1	Introduction	34
2.2	a)Preparation of ferrites	35
	b)Preparation of materials for the ferrites compositions	37

CHAPTER	TITLE	PAGE
2.3	Presintering and Sintering	38
	a) Pre-sintering	38
	b) Final sintering	38
	c) Sintering atmosphere	39
2.4	Mechanism of solid-state reaction	40
2.5	Preparation of ferrite samples	41
	a) Pellet formation	45
	b) Torroid formation	45
	c) Final sintering	45
	PART-B X-RAY DIFFRACTION	47
2.6	Introduction	47
2.7	a) Condition for X-ray diffraction	48
	b) X-ray diffractometer and its principle	52
2.8	Indexing of the powder pattern	56
2.9	a) Results and discussion	67
	PART-C MICROSTRUCTURE	
2.10	Microstructure	74
2.11	Experimental	75
2.12	Results and Discussion	75
III	MAGNETIC PROPERTIES	(84 - 124)

CHAPTER	TITLE	PAGE
	PART-A A.C. SUSCEPTIBILITY STUDIES	
3.1	Introduction	84
3.2	Experimental	85
	a) Description of the susceptibility Apparatus	85
	b) Susceptibility measurement	88
3.3	Results and Discussion	89
	a) Temperature variation of initial susceptibility	90
	PART-B MAGNETIC HYSTERESIS	
3.4	Introduction	97
3.5	Experimental	98
	a) Alternating current Electromagnet Type Hysteresis Loop Tracer	98
	b) Procedure of measurement	101
3.6	Results and Discussion	102
	PART-C INITIAL PERMEABILITY	
3.7	Introduction	115
3.8	Experimental	116
3.9	Results and Discussion	118
	References	122
IV	SUMMARY AND CONCLUSIONS	(125 - 129)
