

# CONTENTS

<b>1. Introduction</b>	01
1.1 Structure of the Neutral Thermosphere and the Ionosphere...	01
1.2 The Energy Balance of the Thermosphere.....	05
1.3 Upper Atmospheric Phenomenon.....	08
1.4 Thermospheric-Ionospheric Coupling system.....	19
1.5 Outline of Present Work.....	25
<b>2. Night Airglow Emissions</b>	33
2.1 Origin of Airglow.....	33
2.2 Classification of Airglow.....	35
2.3 Photochemical Processes in the Ionosphere.....	37
2.4 Observed Airglow Emissions.....	40
<b>3 Thermospheric-ionospheric Modelling</b>	52
3.1 Introduction.....	52
3.2 Thermospheric Modelling.....	54
3.3 Ionospheric Modelling.....	56
3.4 Recent Results from Modelling.....	59
<b>4 Ground Based Instrumentation to Probe the Upper Atmosphere</b>	63
4.1 Introduction.....	63
4.2 Fabry-Perot Interferometer (FPI).....	65
4.3 Ground Based Detection of night Airglow OI 630 nm.....	68
<b>5 Data Analysis</b>	81
5.1 Optical, Ionospheric and Magnetic data.....	81
5.2 Description of Photometer Data.....	83
<b>6 Summary and Conclusion</b>	97
