

GENERAL REMARKS

- 1) The Structures are indicated by a double number, the first part of which indicates the chart in which it occurs and the second part indicates the serial number of the structures -
e.g. (1.1) means structure 1 in chart 1.
- 2) M.Ps were determined by "open capillary method" and are uncorrected.
- 3) PMR spectra were recorded in CDCl_3 using tetra methyl silane (TMS) as an internal reference. The chemical shifts are in ppm.
- 4) IR spectra were recorded in the range $4000\text{-}650\text{ cm}^{-1}$ in nujol or KBr pellet.
- 5) The purity of compounds was checked by T.L.C. using silica gel as adsorbent.
