

## GENERAL REMARKS

- 1) The structures are indicated by a double number, the first part of which indicates the chart in which it occurs and the second part indicates the serial number of the structure. e.g., (2.5) means structure 5 in chart 2.
- 2) The spectra concerning each chapter are given just before the experimental part.
- 3) IR spectra were recorded in chloroform, KBr or in liquid film. The values are reported in  $\text{cm}^{-1}$ .
- 4) PMR spectra were recorded in  $\text{CDCl}_3$ . The chemical shifts ( values) are reported in ppm.
- 5) The melting points and boiling points are uncorrected.
- 6) D.A. refers to Diels-Alder reaction.
