CHAPTER		T I T L E	PAGE NO.
0		INTRODUCTION AND SUMMARY	
	0.1	Introduction	1
	0.2	Chapterwise summary	2
1		ELEMENTARY PROPERTIES OF CHI-SQUARE DISTRIBUTION	
	1.1	Introduction	5
	1.2	Distributional properties	5
	1.3	Relationship of chi-square distribution with other distributions	19
	1.4	Model sampling from chi-square distribution	31
2		ESTIMATION, TESTING OF HYPOTHESIS AND CONFIDENCE INTERVALS FOR THE PARAMETER OF CHI-SQUARE DISTRIBUTION	
	2.1	Introduction	59
	2.2	Estimation for the parameter of chi-square distribution	59
	2.3	Tests of hypotheses for the parameter of a chi-square distribution.	66
	2.4	Shortest confidence intervals for the parameter of a chi-square distribution	77
	2.5	Analysis of contingency Tables	90
	2.6	An asymptotic distribution of log likelihood ratio statistics.	95

CHAPTER		TITLE	PAGE NO.
3		SELECTION PROBLEMS FOR CHI-SQUARE POPULATIONS	
	3.1	Introduction	102
	3.2	Selection problems	103
	3.3	Probability of correct selection.	104
	3.4	Determination of sample size	109
	3.5	Probability of correct selection for selection criteria in terms of minimum value of mean.	115
	3.6	Probability of correct selection for selection criteria based on variance of normal populations.	118
	3.7	Applications.	121
4		APPLICATIONS OF A CHI-SQUARE DISTRIBUTION TO INDUSTRIAL STATISTICS	
	4.1	Introduction	125
	4.2	Applications of a chi-square distribution to determine the parameters n and c.	126
	4.3	Applications of a chi-square distribution in case of acceptance sampling by variables for exponential distribution.	129
	4.4	Applications of chi-square distribution in case of variable plan for normal distribution	132
		TABLES	
	1)	Random Numbers Tables from chi-square distribution	39-58
	2)	Table for Determination of sample size of χ^2 populations	110-114
	3)	Distribution of χ^2	38
	4)	Multipliers for the shortest confidence int.	87-89
	5)	R E F E R E N C E S	136
