

C O N T E N T S

	Page No
Chapter 0 : <u>INTRODUCTION</u>	
0.0 : Introduction to the problem	1
0.1 : Chapterwise Summary	6
0.2 : Priliminaries	8
Chapter 1 : <u>DIFFERENT ASPECTS OF ROBUSTNESS</u>	
1.0 : Introduction	16
1.1 : Concept of robustness	16
1.2 : Achivements expected from a robust procedure	22
1.3 : Someviews of robustness	24
1.4 : Illustrative examples	27
Chapter 2 : <u>INFLUENCE FUNCTION</u>	
2.0 : Introduction	35
2.1 : Influence function and related measures of robustness	35
2.2 : Influence function of the r^{th} Moment	50
2.3 : The influence functions of s^{th} quantile, q-quantile range and MLE.	54
2.4 : Influence functions for the coefficient of Skewness and coefficient of Kurtosis	66
2.5 : Some results related to influence function	70

Chapter 3 :	<u>INFLUENCE FUNCTIONS OF CERTAIN FUNCTIONALS</u>	
3.0 :	Introduction	78
3.1 :	Influence functions of α -trimmed mean and α -trimmed Variance.	78
3.2 :	Influence functions of α -Winsorized mean and α -Winsorized Variance	90
3.3 :	Finite-sample versions of influence function	102
3.4 :	Influence function of M-estimators	112
