

## CONTENTS

Chapter	Title	Page
I	INTRODUCTION AND SUMMARY	1
1.1	Chapterwise summary	1
1.2	Introduction and notation	3
1.3	Estimation of parameters	6
1.4	Residuals	9
1.5	Goodness of Fit of a model	16
1.6	Need for selection of variables	18
II	SELECTION CRITERIA BASED ON RESIDUAL SUM OF SQUARES	21
2.1	Introduction	21
2.2	Coefficient of determination $R^2$	22
2.3	Adjusted $R^2$ -statistic	29
2.4	Mean square error of prediction	38
2.5	$C_p$ -statistic	45
2.6	Illustration	69
III	SEQUENTIAL PROCEDURE FOR SUBSET SELECTION	75
3.1	Introduction	75
3.2	Forward selection method	76
3.3	Backward Elimination	89
3.4	Comparison	97
3.5	Stepwise Regression	102

Chapter	Title	Page
IV	VARIABLE SELECTION IN REGRESSION	
	USING PRINCIPAL COMPONENTS	105
4.1	Introduction	105
4.2	Principal component Regression	106
4.3	Selection Method	110
4.4	Modification for small eigen values	116
4.5	Some Results	117
4.6	Illustration	131
V	EFFECT OF DROPPING VARIABLES ON	
	REGRESSION COEFFICIENTS	134
5.1	Introduction	134
5.2	Bias	135
5.3	Some Effect of dropping variables	136
5.4	How many variables in prediction equation?	141
5.5	Bias reduction methods	144
	APPENDIX	154
