

CONTENTS

Chapter	Title	Page No.
1. INTRODUCTION AND PRELIMINARIES		...1
1.1	Origin of Directional Data	...1
1.2	The Need for Appropriate Analysis	...2
1.3	Example	...2
1.4	Descriptive Statistics	...4
1.4.1	Resultant length	...4
1.4.2	Mean direction	...4
1.4.3	Mean Resultant Length	...5
1.4.4	Circular variance	...5
1.4.5	Circular standard deviation	...6
1.4.6	Median direction	...7
1.4.7	Mode	...7
1.5	An illustrative Example	...8
1.6	Circular Probability Distributions	...11
1.6.1	Uniform Distribution	...12
1.6.2	Von Mises Distribution or Circular Normal Distribution	...13
1.6.2.1	Maximum likelihood estimate of μ and κ	...15
1.6.3	Wrapped Distributions	...19

1.6.3.1	Wrapped Normal Distribution	...19
1.6.3.2	Wrapped Cauchy distribution	...20
1.7	Some Preliminary Results	...21
1.8	Chapters wise Summary	...26
2.	ONE WAY ANOVA FOR CIRCULAR DATA	...29
2.1	Introduction	...29
2.2	Notations	...29
2.3	One Way Model	...31
2.3.1	Assumptions	...31
2.3.2	Hypothesis to be tested	...31
2.4	One Way Analysis Of Variance Technique by Watson and Williams	...32
2.4.1	Development of ANOVA	...32
2.4.2	Approximate distribution of measures Contributing to equation 2.2	...33
2.4.3	Test Statistics for testing H_0	...34
2.4.4	Improved test statistics	...34
2.4.5	ANOVA Table	...35
2.5	One Way ANOVA Methods Proposed By Harrison, Kanji and Gadsden	...36
2.5.1	ANOVA based on geometrical distance Between two angular observations	...36

2.5.2	ANOVA based on Maximum likelihood Estimation	...45
2.5.3	One way ANOVA technique suggested by Anderson-Cook	...49
2.6	Examples	...51
2.7	Comparison of Anderson Cook Approach with Watson William's, Harrison Kanji and Gadsden Approach	...60
3.	ANALYSIS OF VARIANCE TECHNIQUE FOR TWO WAY WITHOUT INTERACTION	...64
3.1	Introduction	...64
3.2	Notations	...64
3.3	Two Way Model	...66
3.3.1	Assumptions	...66
3.3.2	Hypothesis to be tested	...67
3.4	Extension Of Watson William's Method	...67
3.4.1	Development of ANOVA	...67
3.4.2	Approximate Distribution of Various Measures of Variations	...68
3.4.3	Test Statistics for Testing the Hypothesis of Interest	...69
3.4.4	ANOVA table	...70

3.5	Two Way ANOVA Based On Geometrical Distance	
	Between Two Angular Observations	...71
	3.5.1 Development Of New Approach	...71
3.6	Examples	...76
4.	ANALYSIS OF VARIANCE TECHNIQUE FOR TWO WAY	
	CLASSIFICATIONS WITH INTERACTION AND OTHER	
	FACTORIAL DESIGNS	...85
4.1	Introduction	...85
4.2	Notation	...85
4.3	The Model, Assumptions and Hypothesis	
	of Interest	...87
4.4	Extension Of Watson William's Approach By Harrison,	
	Kanji and Gadsden	...88
4.5	Approach Based On Geometrical Distance between Two	
	Angular Observations	...95
4.6	Anderson-Cook Approach	...105
4.7	General 2^r Factorial Experiments	...111
4.8	Industrial Example:	...114
	Appendix :	...119
	Bibliography and Author Index	...121
