		<u>Page</u>
Chapter 1	Introduction	01
Chapter 2	<u>The MVUE of $\Pr(Y < X)$ in the normal case</u>	
2.1	Introduction	09
2.2	The MVUE of R_1 when Y is standard normal variate and X is normal variate with known mean μ and unknown variance σ^2	12
2.3	The MVUE of R_1 when Y is standard normal variate and X is normal with mean μ and σ^2	15
2.4	The MVUE of R when both X and Y distributions are unknown	28
Chapter 3	<u>The MVUE of $\Pr(Y < X)$ in the exponential case</u>	
3.1	Introduction	33
3.2	The MVUE of R when the parameters are unknown	33
3.3	MVUE of R when the distribution of Y is known	37
Chapter 4	<u>The MVUE of $\Pr(Y < X)$ for truncation parameter exponential families</u>	
4.1	Introduction	41
4.2	Conditional density of X_1 given the sufficient and complete statistics	42
4.3	The MVUE of R	51
4.4	The MVUE of R for the particular examples of the family	53
