

ACKNOWLEDGEMENT

I am extremely happy to express my heartfelt gratitude towards my research guide Dr. A.R. Shelar, M.Sc., Ph.D., University Department of Chemistry, Shivaji University, Kolhapur, for his guidance, constant encouragement and appreciation of my efforts.

I wish to thank Dr. M.H. Jagadale, Professor and Head, University Department of Chemistry, Shivaji University, Kolhapur, for providing me all necessary facilities during the course of my research.

I wish to record my sense of gratitude towards Dr. M.B. Hogale for his keen interest and supervision in my work.

Prin. K. Bhogishayana, former Principal of the Sangameshwar College, Solapur, now the honourable Vice-Chancellor, Shivaji University, Kolhapur, has helped me in both capacities. Without his personal attention and encouragement I would not have undertaken this work. Principal C.H. Save, Sangameshwar College, Solapur, has kept the same attitude towards me. I sincerely wish to remain beholden to both of them.

I am thankful to the U.G.C. (New Delhi) for having awarded me Teacher-Fellowship under F.I.P. in VI Five Year Plan. The authorities of the Sangameshwar Education Society, Solapur were kind and considerate enough to grant me a study-leave of one year to complete the present work. I am grateful to these authorities.

I wish to record my thanks to Shri H.A. Patankar, Registrar, Shivaji University, Kolhapur, for providing all required assistance from time to time.

My colleagues in Sangameshwar College, Solapur and especially my friend Shri A.R. Sande from Satara helped me beyond their capacities. I am indebted to them.

My wife handled the home-front effectively in my absence at Solapur. This gave me a mental peace, which is rightly needed in this type of work. I wish to record my sense of gratitude towards her.

Lastly, I wish to thank Shri V.G. Chopade for neat typing of this dissertation.

Kolhapur:
July ,1984.
