

GENERAL REMARKS

- 1) The structures are indicated by a double number, the first part of which indicates the chart in which it occurs and the second part indicates the serial number of the structure e.g. (2.5) means structure 5 in chart 2.
- 2) The spectra are given just before the experimental part.
- 3) IR spectra were recorded in nujol or as a liquid film. The values reported are cm^{-1} .
- 4) PMR spectra were recorded in CCl_4 with tetramethylsilane (TMS) as an internal reference. The chemical shifts (δ values) are reported in ppm.
- 5) The melting points are uncorrected.
