

### List of Tables

- Table 1 : Monthly fluctuations in average values of Pariah kite, Milvus migrans population at nine communal roosts in Kolhapur city.
- Table 2 : The monthly average values of important climatic factors and the number of Pariah kite (Milvus migrans) and Whitebacked Vulture (Gyps bengalensis) in Kolhapur city.
- Table 3 : Correlation between monthly average number of Pariah kite, Milvus migrans and the eight important climatic factors studied during the investigations.
- Table 4 : Roosting schedule of Pariah kite in relation to some climatic factors at roost R-I.
- Table 5 : Roosting schedule of Pariah kite in relation to some climatic factors at roost R-II.
- Table 6 : Roosting schedule of Pariah kite in relation to some climatic factors at roost R-III.
- Table 7 : Roosting schedule of Pariah kite at Roost R-III in relation to the Median Time (50 % of the total population arrival, calculated at 5 minute interval observations) with reference to some important physical factors.
- Table 8 : Roosting schedule of Pariah kite in relation to some climatic factors at Roost R-IV.
- Table 9 : Roosting schedule of Pariah kite in relation to some climatic factors at Roost R-V.
- Table 10 : Roosting schedule of Pariah kite in relation to some climatic factors at Roost R-VII. what about  
Roost VI ?
- Table 11 : Correlation between Mean Time of arrival of kites at different roosts and important climatic factors.

- Table 12 : Correlation between Median Time and the six parameters at Roost R-III.
- Table 13 : Monthly average number of Whitebacked Vulture, Gyps bengalensis at Ramanand nagar roost from January 1987 to March 1988.
- Table 14 : Correlation between monthly average number of Whitebacked Vulture, Gyps bengalensis and the climatic factors.
- Table 15 : Monthly fluctuations of crows (House crow, Corvus splendens and Jungle crow Corvus macrorhynchos) and Common myna, Aeridotheres tristis populations at the mixed roost R-I.
- Table 16 : Monthly fluctuations of crows (House crow, Corvus splendens and Jungle crow, Corvus macrorhynchos) and Common myna, Aeridotheres tristis populations at the mixed roost R-III.
- Table 17 : Sightings of Pariah kite (Milvus migrans), Whitebacked Vulture (Gyps bengalensis) and Scavenger Vulture, Neophron percnopterus at the three feeding sites in Kolhapur city from January 1987 to March 1988.
- Table 18 : Observations on nesting activities of Pariah kite in Kolhapur city.
- Table 19 : Habitat Utilization by Pariah kite in Kolhapur city.
- Table 20 : Habitat selection and success of nesting in Pariah kite.
- Table 21 : Reuse of the nesting site and success of reproduction in Pariah kite, Milvus migrans.
