

List of Plates

- Plate 1 a. Natural vegetation in the Western Ghats, sub-tropical evergreen- semievergreen forest.
b. Steep slopes considered as non cultivable waste land. Notice shifting cultivation in the valley.
- Plate 2 a. Culturable waste land, mainly open grasslands on plateau.
b. Cultivated land on hill slopes and terraces.
- Plate 3 a. Gaur, Bos gaurus, the largest herbivor in the region.
b. Chital Axis axis stag, now rare in the study area.
- Plate 4 a. Peafowl Pavo cristatus.
b. Barking deer Muntiacus muntjak highly poached animal in the area.
- Plate 5 a. Common Langur Presbytis entellus
b. Bonnet Monkey Macaca radiata.
Both are considered as growing pest on agriculture.
- Plate 6 a. Natural thick vegetation at the background, clear felling at the centre.
b. Badly degraded barren hill slopes in the study area.
- Plate 7 a. Large scale tree cutting of prime forest, notice tall trees at the background.
b. Illicitly cut trees waiting for transportation.
- Plate 8 a. Daily fuelwood requirements carried by household members, notice women.
b. Collection of fuelwood, monsoon storage by households in the study area.
- Plate 9 a. Shifting cultivation practices on the steep hill slopes.
b. Shifting cultivation, encroachment in thick forest.
See the exposed rock.

List of Plates (Contd..)

- Plate 10 a. Nachani Cultivation, the major crop of the study area.
b. Storage of the crop on poles to protect it from the pest.
- Plate 11 a. Buffelos in the clearing in forest habitat.
b. Cattle herd in the semi degraded habitat.
- Plate 12 a. Goats in the degraded habitat.
b. Totally degraded habitat on hill top. See exposed rocks tree stumps, and reservoir in the background.
- Plate 13 a. Land slides and road damage on way to Nivale,
b. Erosion by the newly constructed road to Tanali.
- Plate 14 a. The Road Construction in the forest area, inevitable destruction of rare forest wealth on the hill tops.
b. The rapidly degrading catchment and the reservoir.
- Plate 15 The Human impact on the sensetive forest ecosystem in the study area.
a. Tree in the catchment.
b. Tree in the submergence.
