B)Site of Collection of gastropods13C)Time of Collection of gastropods13D)Maintenance of Gastropods132METHODS14
C) Time of Collection of gastropods 13 D) Maintenance of Gastropods 13 2 METHODS 14
D) Maintenance of Gastropods 13 2 METHODS 14
2 METHODS 14
A) Histological Methods 15
B) Histochemical Methods 17
III I OBSERVATIONS 23
Semperula maculata 23
A) Histological observations on cerebral 23
ganglia during breeding season
B) Histochemical observations on cerebral
ganglia during breeding season 28
C) Histological observations on ovotestis
during breeding season 29

**b** 

	D)	Histochemical observations on ovotestis		
	<b></b> \	during breeding season		
	E)	Histological observations on cerebral ganglic		
	-1	during aestivation period	32 alia	
	F)	Histochemical observations on cerebral gang during aestivation period.	33	
	G)	Histological observations on ovotestis during		
	-,	aestivation period.	34	
	H)	Histochemical observations on ovotestis		
	,	during aestivation period.	36	
2	CRYF	TOZONA SEMIRUGATA	38	
_	A)	Histological observations on cerebral		
		ganglia during breeding season	38	
	B)	Histochemical observations on cerebral		
	- 1	ganglia during breeding season	41	
	C)	Histological observations on ovotestis		
	-,	during breeding season	42	
	D)	Histochemical observations on ovotestis		
	,	during breeding season	44	
	E)	Histological and histochemical observations		
	7	on neurosecretory cells in optics tentacles	46	
	F)	Histological observations on cerebral		
		ganglia during aestivation period	47	
	G)	Histochemical observations on cerebral gan		
	,	during aestivation period	47	
	H)	Histological and histochemical observations		
		on the ovotestis during aestivation period	50	
	I)	Histological and histochemical observations	on	
	•	neurosecretory cells in the optic tentacles		
		during aestiviton	52	
IV	DISC	CUSSIONS	53	
	1	Confirmation of dorsal bodies	53	
	2	Localities of neurosecretory cells in		
		cerebral ganglia	55	
	3	Cellular division of labour in neurosecretion	-	
		by cerebral ganglia(?)	55	
	4	Season dependant alterations in the
