Section	Title	Page
<b><u>CHAPTER-I</u></b>		
<b><u>History of Boundary Layer Theory</u></b>		
1.	Outline of the boundary layer theory	1
2.	Major developments in axially symmetrical boundary layer.	4
3.	Steady and unsteady two dimensional Laminar boundary layer.	5
4.	Basic concepts required for our problems to be discussed in Chapter-II.	9
	References	21
<b><u>CHAPTER-II</u></b>		
<b><u>Study of some boundary layer problems</u></b>		
1.	Introduction	26
2.	Approximate solution of Pohlhausen's problem of forced convection in a Laminar boundary layer on a flat plate	38
3.	Approximate solution of the Pohlhausen's problem of free convection from heated vertical plate	51
4.	Boundary layer for Howarth's flow past a wedge	54
5.	Boundary layer for Howarth's flow along the wall of a convergent channel.	
6.	Boundary Layer with suction along porous wall in Tani's and Howarth's flow.	60
	References	69
