	Abstract	

Introduction

Present Work

Experimental

PART A -

General

Preparation of cation exchange  
resins

Synthesis of substituted  
coumarins

PART B -

General

Activation of Amberlite IR-120,  
cation exchange resin

Synthesis of quinolones, benzo-  
furanone, methyl uracil, anthra-  
quinone, fluorescein using  
cation exchange resin

Comparison with other methods
