Chapter	Title	Page
	CHAPTER – I	...
	CHAPTER – I	1-31
1.	INTRODUCTION	...
1.1	Thin Film Technology	...
1.2	Thin Film Deposition Techniques	...
1.2.1	Physical deposition methods	
1.2.2	Physical vapour deposition (PVD)	
1.2.3	Sputtering	
1.2.4	Chemical deposition methods	
1.2.5	Chemical vapour deposition	
1.2.6	Solution growth or chemical bath deposition	
1.2.7	Langmuir-Blodgett technique	
1.2.8	Spray pyrolysis	
1.2.9	Screen printing	
1.2.10	Spin coating technique	
1.3	Film Thickness	...
1.3.1	Weight difference method	
1.3.2	Methods using interference of fringes of equal thickness	
1.4	Properties of Thin Films	...
1.4.1	Mechanical properties	
1.4.2	Adhesion of thin films	
1.4.3	Optical properties of thin films	
1.4.4	Light generation and optical waveguides	
1.4.5	Light modulation	
1.4.6	Film fluorescence	
1.5	Fluorescence Mechanism	...
		17

Chapter	Title	Page
1.5.1	Vibrational relaxation (VR)	
1.5.2	Internal conversion (IC)	
1.5.3	Intersystem crossing (ISC)	
1.5.4	Fluorescence : a radiative de-activation	
1.5.5	Fluorescence quenching	
1.5.6	Monomer fluorescence and concentration quenching	
1.5.7	Quenching of monomer fluorescence due to excimer formation	
1.6	Applications ...	23
1.6.1	Optoelectronics and integrated optics	
1.6.2	Electroluminescent (EL) diodes and EL lamps	
1.6.3	Plastic scintillators	
1.7	Present Work ...	28
	CHAPTER – 2	32- 29 ³¹
2	EXPERIMENTAL	... 32
2.1	Purification of Polynuclear Aromatic Hydrocarbons	32
2.2	Preparation of Solutions ...	33
2.3	Cleaning of the Substrates ...	33
2.4	Thin Film Preparation ...	34
2.5	Determination of Thickness of the Film ...	34
2.6	Recording of Absorption Spectra ...	36
2.7	Recording of Fluorescence and Fluorescence Excitation Spectra ...	37
2.8	Storage of the Films ...	37
2.9	Comparison between LB and Spin coating Films ...	39
	CHAPTER - 3	40-102
3.	RESULT AND DISCUSSION	... 40
3.1	Fluorescence of Pyrene Doped Polystyrene (PS) Films ...	40
3.2	Structural Characterization of the Films ...	46

Chapter	Title	Page
3.3	Absorption Studies and Band Gap Energy ... Estimations	49
3.4	Fluorescence of Polystyrene Films Doped by ... Perylene	53
3.5	Solute-Solute Interaction in Polymer Matrix : ... Pyrene-Pewrylene Doped PS Films	56
3.6	Fluorescence and Absorption Studies of Naphthalene ... Doped Polymer Films	62
3.7	Solute-Solute Interaction in Polymer Matrix ... Naphthalene-Pyrene Doped PS Films	68
3.8	Mechanism of Exciplex Formation and Emission ...	73
3.9	Fluorescence Studies of Biphenyl Doped PS Films ...	76
3.10	Fluorescence of Polystyrene Films Doped by ... Biphenyl and Pyrene	80
3.11	Concentration Dependence of Fluorescence of PS ... Films Doped by Pyrene and Varying amounts of Biphenyl	83
3.12	Fluorescence of 9ACA Doped Polymer Films ...	88
3.13	9ACA Doped Polystyrene Films Prepared from ... Benzene Solution	89
3.14	9ACA Doped Polystyrene Films Prepared from CCl ₄ ... solution	91
3.15	9ACA Doped Polyvinyl Alcohol Films Prepared ... from Ethyl Alcohol Solution	91
3.16	Solute-Solute Interaction in Polymer Matrix 9ACA ... Pyrene Doped PS Films	98
	CHAPTER - 4	103
	CONCLUSION	
	CHAPTER - 5	107
	SUMMARY	
	REFERENCES ...	113
	PUBLICATION ...	122
