

C O N T E N T S

CHAPTER-I

INTRODUCTION

1.1	Polymer Supports in Syntheses and Separations.	1
1.2	Polymer Supported Catalysts and Reagents.	2
1.3	Polymer Supported Ligands.	5
1.3.1	Synthesis of Chelating Polymers.	8
1.3.1.1	Modification of Preformed Polymers.	
1.3.1.2	Polymerization of Vinyl Monomers Containing Chelating Groups.	
1.3.1.3	Polymerization of Condensation monomers Containing Chelating Groups.	
1.3.2	Theory.	15
1.3.3	Kinetics.	16
1.3.4	Stability Constants.	17
1.3.5	Ion Selectivity.	19
1.3.6	Adsorption of Metal Ions and Organic Molecules.	20
1.3.7	Application of Chelating Polymers.	26
1.4	Scope of the Present Investigation	27

CHAPTER-2

RESULTS AND DISCUSSION 29

2.1	Cellulosic Based Polymer Supports Containng Pendant	30
-----	---	----

Amino Groups.	
2.2 Polystyrene Support Containing Pendant Amino Groups.	35
2.3 Polymer Supported Schiff bases	36
2.4 Characterization.	37
2.5 Adsorption of Metal Ions.	45
2.6 Conclusions.	49

CHAPTER - 3

EXPERIMENTAL

3.1 Materials.	51
3.2 Methods.	52
3.2.1: Isocynato-Acetyl Cellulose (IAC-H).	
3.2.2: Amino-Acetyl Cellulose (AAC-H).	
3.2.3: Amino Acetyl Cellulose (AAC-T).	
3.2.4: Amino Ethyl Cellulose (AEC-H).	
3.2.5: Polystyrene with Pendant Amino Groups (A-PS).	
3.3 Polymer Supported Schiff Bases.	53
3.4 Chemical methods.	55
3.4.1: Determination of Acetyl Content and Degree of Substitution of Cellulose Acetate.	56
3.4.2: Estimation of Amino Group Capacity.	56
3.4.3: Adsorption of Metal Ions.	57
3.5 Instrumental Methods.	58
