

" Studies on controlling factors in
electroplating of metals and alloys "

C O N T E N T S

CHAPTER 1

1.1	General Introduction	1-4
1.2	Controlling factors in electroplating of metals (Aim of the work)	4-11
1.3	The equipment for the work of electrodeposition, & Applications.	11-12

CHAPTER 2

2.1	Experimental set up	14
2.2	Experimental procedure for the preparation of bath solution.	14
2.3	Copper coulometer and preparation of ottel's solution	14
2.4	Anode and cathod materials	15
2.5	Working process of alloy deposition.	16-18
2.6	Analysis of Deposits	18-19
2.7	Microphotographs	20

CHAPTER 3

3.1	Electrodeposition of single metals (Zinc and Tin)	21-22
3.2	Electrodeposition of zinc from thioynato bath	23-24

3.2.1	Brief Review of the earlier work. (GENERAL)	25
3.2.2	Earlier work on Electrodeposition..	25
	of work zinc.		
3.3	Results and Discussion (for Zinc)..	26-48
3.3.1	Summary-optimum conditions	42
3.4	Electrodeposition of Tin from	49
	acid chloride bath		
3.4.1	Review of the Earlier Work	51
	(Tin deposition)		
3.5	Results and Discussion (for Tin)..	52-73
3.5.1	Summary-optimum conditions	68
3.6	Role of complexes in electro	74-77
	deposition of Zinc and Tin		
<u>CHAPTER 4</u>			
4.1	Electrodeposition of Alloys	78
	Introduction (Ni-Cr alloy)		
4.2	Co. deposition of Metals	78-80
	Simultaneous Discharge of cations.	
4.3	Influence of Plating Parameters	80-81
	in Alloy Deposition		
4.4.	Electrodeposition of Nickel	81-83
	Chromium Alloys		
	(The Aim and Scope of the		
	present work) ;Earlier work).		
4.5	Results and Discussion	84-110
	(for Nickel-Chromium alloy)		
4.5.1	Summary-optimum conditions	102
4.5.3	The Role of Silver as an	110-111
	addition agent in alloy-deposition		
	<u>References.</u>		112-117
